Unfired pressure vessels - Part 3: Design

Táto norma obsahuje anglickú verziu európskej normy.  
This standard includes the English version of the European Standard.

Táto norma bola oznámená vo Vestníku ÚNMS SR č. 12/14

Obsahuje: EN 13445-3:2014

Oznámením tejto normy sa ruší  
STN EN 13445-3 (69 0010) zo septembra 2011

**119884**

Úrad pre normalizáciu, metrológiu a skúšobníctvo SR, odbor SÚTN, 2015  
Podľa zákona č. 264/1999 Z. z. v znení neskorších predpisov sa môžu slovenské technické normy  
rozmnožovať a rozširovať iba so súhlasom Úradu pre normalizáciu, metrológiu a skúšobníctvo SR.

English Version

**Unfired pressure vessels - Part 3: Design**

Récipients sous pression - Partie 3: Conception

Unbefeuerte Druckbehälter - Teil 3: Konstruktion

This European Standard was approved by CEN on 19 August 2014.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

11.1	Purpose.....	154
11.2	Specific definitions .....	154
11.3	Specific symbols and abbreviations.....	154
11.4	General.....	157
11.5	Narrow face gasketed flanges .....	161
11.6	Full face flanges with soft ring type gaskets .....	176
11.7	Seal welded flanges .....	179
11.8	Reverse narrow face flanges .....	179
11.9	Reverse full face flanges.....	182
11.10	Full face flanges with metal to metal contact .....	186
12	Bolted domed ends.....	189
12.1	Purpose.....	189
12.2	Specific definitions .....	189
12.3	Specific symbols and abbreviations.....	189
12.4	General.....	189
12.5	Bolted domed ends with narrow face gaskets.....	189
12.6	Bolted domed ends with full face joints .....	191
13	Heat Exchanger Tubesheets.....	193
13.1	Purpose.....	193
13.2	Specific definitions .....	193
13.3	Specific symbols and abbreviations.....	193
13.4	U-tube tubesheet heat exchangers .....	196
13.5	Fixed tubesheet heat exchangers .....	210
13.6	Floating tubesheet heat exchangers.....	238
13.7	Tubesheet characteristics.....	255
13.8	Maximum permissible tube to tubesheet joint stress .....	262
13.9	Maximum permissible longitudinal compressive stress for tubes.....	263
13.10	Design of tubesheet flange extension with a narrow face gasket.....	266
13.11	Design of tubesheet flange extension with a full face gasket.....	269
13.12	Special tube-to-tubesheet welded joints .....	272
14	Expansion bellows.....	275
14.1	Purpose.....	275
14.2	Specific definitions .....	275
14.3	Specific symbols and abbreviations.....	277
14.4	Conditions of applicability .....	279
14.5	U-shaped unreinforced bellows .....	281
14.6	U-shaped reinforced bellows.....	295
14.7	Toroidal bellows.....	303
14.8	Fabrication.....	310
14.9	Inspection and testing.....	312
14.10	Bellows subjected to axial, lateral or angular displacements.....	314
15	Pressure vessels of rectangular section.....	319
15.1	Purpose.....	319
15.2	Specific definitions .....	319
15.3	Specific symbols and abbreviations.....	319
15.4	General.....	320

15.5	Unreinforced vessels.....	320
15.6	Reinforced vessels .....	326
15.7	Openings.....	333
16	Additional non-pressure loads .....	335
16.1	Purpose.....	335
16.2	Specific definitions .....	335
16.3	Specific symbols and abbreviations.....	336
16.4	Local loads on nozzles in spherical shells .....	337
16.5	Local loads on nozzles in cylindrical shells .....	347
16.6	Line loads .....	355
16.7	Lifting lugs.....	361

Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of the EU Pressure Equipment Directive 97/23/EC.....		865

## Foreword

This document (EN 13445-3:2014) has been prepared by Technical Committee CEN/TC 54 “Unfired pressure vessels”, the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2014, and conflicting national standards shall be withdrawn at the latest by December 2014.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association, and supports essential requirements of EU Directive(s).

For relationship with EU Directive(s), see informative annex ZA, which is an integral part of this document.

This European Standard consists of the following Parts:

- Part 1: *General.*
- Part 2: *Materials.*
- Part 3: *Design.*
- Part 4: *Fabrication.*
- Part 5: *Inspection and testing.*
- Part 6: *Requirements for the design and fabrication of pressure vessels and pressure parts constructed from spheroidal graphite cast iron.*
- CR 13445-7, *Unfired pressure vessels — Part 7: Guidance on the use of conformity assessment procedures.*
- Part 8: *Additional requirements for pressure vessels of aluminium and aluminium alloys.*
- CEN/TR 13445-9, *Unfired pressure vessels — Part 9: Conformance of EN 13445 series to ISO 16528*

Although these Parts may be obtained separately, it should be recognised that the Parts are inter-dependant. As such the manufacture of unfired pressure vessels requires the application of all the relevant Parts in order for the requirements of the Standard to be satisfactorily fulfilled.

Corrections to the standard interpretations where several options seem possible are conducted through the Migration Help Desk (MHD). Information related to the Help Desk can be found at <http://www.unm.fr/en13445@unm.fr>. A form for submitting questions can be downloaded from the link to the MHD website. After subject experts have agreed an answer, the answer will be communicated to the questioner. Corrected pages will be given specific issue number and issued by CEN according to CEN Rules. Interpretation sheets will be posted on the website of the MHD.

This document supersedes EN 13445-3:2009. This new edition incorporates the Amendments which have been approved previously by CEN members, and the corrected pages up to Issue 5 without any further technical change. Annex Y provides details of significant technical changes between this European Standard and the previous edition.

Amendments to this new edition may be issued from time to time and then used immediately as alternatives to rules contained herein. It is intended to deliver a new Issue of EN 13445:2014 each year, starting with the present document as Issue 1, consolidating these Amendments and including other identified corrections.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## 1 Scope

This Part of this European Standard specifies requirements for the design of unfired pressure vessels covered by EN 13445-1:2014 and constructed of steels in accordance with EN 13445-2:2014.

EN 13445-5:2014, Annex C specifies requirements for the design of access and inspection openings, closing mechanisms and special locking elements.

NOTE This Part applies to design of vessels before putting into service. It may be used for in service calculation or analysis subject to appropriate adjustment.

## 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
