NORME EUROPÉENNE

EUROPÄISCHE NORM

June 2014

ICS 29.130.10

Supersedes EN 62271-202:2007

English Version

**High-voltage switchgear and controlgear - Part 202: High-voltage/low-voltage prefabricated substation  
(IEC 62271-202:2014)**

Appareillages à haute tension - Partie 202: Postes  
préfabriqués haute tension/basse tension  
(CEI 62271-202:2014)

Hochspannungs-Schaltgeräte und -Schaltanlagen - Teil  
202: Fabrikfertige Stationen für  
Hochspannung/Niederspannung  
(IEC 62271-202:2014)

This European Standard was approved by CENELEC on 2014-05-01. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Foreword

The text of document 17C/595/FDIS, future edition 2 of IEC 62271-202, prepared by SC 17C "High-voltage switchgear and controlgear assemblies" of IEC TC 17 "Switchgear and controlgear" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN 62271-202:2014.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2014-11-01
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2017-05-01

This document supersedes EN 62271-202:2007.

EN 62271-202:2014 includes the following significant technical changes with respect to EN 62271-202:2007:

- a) regarding temperature-rise test an alternative method for liquid filled transformers is (re)introduced and the temperature-rise test method for dry-type transformers is specified more precisely;
- b) testing procedure for short time and peak withstand current tests are specified more precisely;
- c) assessment of electromagnetic fields is considered including a type test (optional) according CLC/TR 62271-208:2010;
- d) influence of the product on the environment is considered (Clause 12);
- e) internal arc test requirements have been adapted to EN 62271-200:2012 and requirements for the assessment of pressure relief volumes below the floor / ground has been assigned;
- f) the method for defining the load factor in an enclosure for liquid filled transformers is extended with different temperature rises for the transformer outside the enclosure (Annex DD);
- g) for the calculation of the load factor of dry-type transformers in an enclosure the insulation systems according to EN 60076-1:2011, Tables B.1 and B.2 are worked out in detail.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

## Endorsement notice

The text of the International Standard IEC 62271-202:2014 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 60059:1999	NOTE	Harmonized as EN 60059:1999.
IEC 60068 (Series)	NOTE	Harmonized as EN 60068 (Series).
IEC 60076 (Series)	NOTE	Harmonized as EN 60076 (Series).
IEC 60243-1:2013	NOTE	Harmonized as EN 60243-1:2013.
IEC 61936-1:2010	NOTE	Harmonized as EN 61936-1:2010.
IEC 62271-4:2013	NOTE	Harmonized as EN 62271-4:2013.
IEC/TS 62271-304:2008	NOTE	Harmonized as CLC/TS 62271-304:2008.
ISO 1460	NOTE	Harmonized as EN ISO 1460.

ISO 1461	NOTE	Harmonized as EN ISO 1461.
ISO 2081	NOTE	Harmonized as EN ISO 2081.
ISO 2409	NOTE	Harmonized as EN ISO 2409.
ISO 3231:1993	NOTE	Harmonized as EN ISO 3231:1997.
ISO 7784 (Series)	NOTE	Harmonized as EN ISO 7784 (Series).
ISO 9227	NOTE	Harmonized as EN ISO 9227.
ISO 10546	NOTE	Harmonized as EN ISO 1460.
ISO 11997 (Series)	NOTE	Harmonized as EN ISO 11997 (Series).
ISO 12944 (Series)	NOTE	Harmonized as EN ISO 12944 (Series).
ISO 13732-1:2006	NOTE	Harmonized as EN ISO 13732-1:2008.

## Annex ZA (normative)

### Normative references to international publications with their corresponding European publications

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 When an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: [www.cenelec.eu](http://www.cenelec.eu)

### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

#### IEC Catalogue - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

#### IEC publications search - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in 14 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

#### IEC Glossary - [std.iec.ch/glossary](http://std.iec.ch/glossary)

More than 55 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [csc@iec.ch](mailto:csc@iec.ch).

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Catalogue IEC - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

#### Recherche de publications IEC - [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 14 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

#### Glossaire IEC - [std.iec.ch/glossary](http://std.iec.ch/glossary)

Plus de 55 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [csc@iec.ch](mailto:csc@iec.ch).

## CONTENTS

FOREWORD.....	8
INTRODUCTION.....	10
1 General .....	11
1.1 Scope .....	11
1.2 Normative references.....	11
2 Normal and special service conditions .....	13
2.1 Normal service conditions .....	13
2.1.1 Indoor switchgear and controlgear .....	13
2.1.1.101 Low-voltage switchgear and controlgear .....	13
2.1.1.102 Transformer.....	13
2.1.2 Outdoor switchgear and controlgear .....	14
2.2 Special service conditions.....	14
2.2.1 Altitude .....	14
2.2.2 Pollution .....	14
2.2.3 Temperature and humidity .....	15
2.2.4 Vibrations, shock or tilting.....	15
2.2.5 Wind speed .....	15
2.2.6 Other parameters .....	15
3 Terms and definitions .....	15
4 Ratings.....	17
4.1 Rated voltage ( $U_r$ ) .....	18
4.2 Rated insulation level.....	18
4.3 Rated frequency ( $f_r$ ).....	19
4.4 Rated normal current and temperature rise .....	19
4.4.1 Rated normal current ( $I_r$ ) .....	19
4.4.2 Temperature rise .....	19
4.4.3 Particular points of Table 3 .....	19
4.5 Rated short-time withstand current ( $I_k$ ) .....	19
4.5.101 Rated short-time withstand current of high voltage switchgear and controlgear and high voltage interconnection ( $I_k$ ).....	20
4.5.102 Rated short-time phase to earth withstand current ( $I_{ke}$ ).....	20
4.5.103 Rated short-time withstand currents of low voltage switchgear and controlgear and low voltage interconnection ( $I_{cw}$ ).....	20
4.6 Rated peak withstand current ( $I_p$ ) .....	20
4.6.101 Rated peak withstand current ( $I_p$ ).....	20
4.6.102 Rated peak phase to earth withstand current ( $I_{pe}$ ).....	20
4.6.103 Rated peak withstand currents of low voltage switchgear and controlgear and low voltage interconnection ( $I_{pk}$ ) .....	20
4.7 Rated durations of short circuit ( $t_k$ ) .....	20
4.7.101 Rated duration of short circuit ( $t_k$ ).....	21
4.7.102 Rated duration of phase to earth short circuit ( $t_{ke}$ ) .....	21
4.7.103 Rated duration of short circuits for low voltage switchgear and controlgear and low voltage interconnection .....	21
4.7.104 Rated duration of short circuits for transformers .....	21
4.8 Rated supply voltage of closing and opening devices and auxiliary and control circuits ( $U_a$ ).....	21
4.9 Rated supply frequency of closing and opening devices and of auxiliary circuits .....	21

4.10	Rated pressure of compressed gas supply for controlled pressure systems .....	21
4.11	Rated filling levels for insulation and/or operation .....	21
4.101	Rated maximum power and class of enclosure .....	22
4.101.1	Rated maximum power of the prefabricated substation .....	22
4.101.2	Rated class of enclosure .....	22
4.102	Ratings of the internal arc classification .....	22
4.102.1	General .....	22
4.102.2	Types of accessibility (A, B, AB) .....	22
4.102.3	Rated arc fault currents ( $I_A$ , $I_{Ae}$ ) .....	22
4.102.4	Rated arc fault duration ( $t_A$ , $t_{Ae}$ ) .....	23
5	Design and construction .....	23
5.1	Requirements for liquids in switchgear and controlgear .....	23
5.2	Requirements for gases in switchgear and controlgear .....	23
5.3	Earthing of switchgear and controlgear .....	24
5.4	Auxiliary and control equipment .....	25
5.5	Dependent power operation .....	25
5.6	Stored energy operation .....	25
5.7	Independent manual or power operation (independent unlatched operation) .....	25
5.8	Operation of releases .....	25
5.9	Low- and high-pressure interlocking and monitoring devices .....	25
5.10	Nameplates .....	25
5.11	Interlocking devices .....	25
5.12	Position indication .....	26
5.13	Degree of protection provided by enclosures .....	26
5.14	Creepage distances for outdoor insulators .....	26
5.15	Gas and vacuum tightness .....	26
5.16	Liquid tightness .....	26
5.17	Fire hazard (flammability) .....	26
5.18	Electromagnetic compatibility (EMC) .....	26
5.101	Protection of the prefabricated substation against mechanical stress .....	26
5.102	Protection of the environment due to internal defects .....	27
5.103	Internal arc fault .....	27
5.104	Enclosure .....	28
5.104.1	General .....	28

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**HIGH-VOLTAGE SWITCHGEAR AND CONTROLGEAR –****Part 202: High-voltage/low-voltage prefabricated substation**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 62271-202 has been prepared by subcommittee 17C: High-voltage switchgear and controlgear assemblies, of IEC technical committee 17: Switchgear and controlgear.

This second edition cancels and replaces the first edition published in 2006. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) regarding temperature-rise test an alternative method for liquid filled transformers is (re)introduced and the temperature-rise test method for dry-type transformers is specified more precisely;
- b) testing procedure for short time and peak withstand current tests are specified more precisely;
- c) assessment of electromagnetic fields is considered including a type test (optional) according IEC/TR 62271-208:2009;

- d) influence of the product on the environment is considered (Clause 12);
- e) internal arc test requirements have been adapted to IEC 62271-200:2011 and requirements for the assessment of pressure relief volumes below the floor / ground has been assigned;
- f) the method for defining the load factor in an enclosure for liquid filled transformers is extended with different temperature rises for the transformer outside the enclosure (Annex DD);
- g) for the calculation of the load factor of dry-type transformers in an enclosure the insulation systems according to IEC 60076-1:2011, Tables B.1 and B.2 are worked out in detail.

The text of this standard is based on the following documents:

FDIS	Report on voting
17C/595/FDIS	17C/598/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

This standard should be read in conjunction with IEC 62271-1:2007 and its Amendment 1:2011, to which it refers and which is applicable, unless otherwise specified. In order to simplify the indication of corresponding requirements, the same numbering of clauses and subclauses is used as in IEC 62271-1. Amendments to these clauses and subclauses are given under the same numbering, whilst additional subclauses are numbered from 101.

A list of all parts of the IEC 62271 series can be found, under the general title *High-voltage switchgear and controlgear*, on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

Prefabricated substations are defined as a type-tested assembly comprising an enclosure containing in general transformers, low-voltage and high-voltage switchgear, connections and auxiliary equipment to supply low-voltage energy from a high-voltage system or vice versa. These substations are in locations accessible to the public and should ensure protection to persons according to the specified service conditions.

This means that, in addition to the specified characteristics, ratings and relevant test procedures, particular attention has been paid to the specification concerning the protection of persons, both operators and general public. Use of type-tested components and suitable design and construction of the enclosure ensure this protection. The correct design and performance of the prefabricated substation are verified by means of relevant type tests described in this standard, including internal arc tests.

## HIGH-VOLTAGE SWITCHGEAR AND CONTROLGEAR –

### Part 202: High-voltage/low-voltage prefabricated substation

## 1 General

### 1.1 Scope

This part of IEC 62271 specifies the service conditions, rated characteristics, general structural requirements and test methods of high voltage/low voltage or low voltage/high voltage prefabricated substations, which are cable-connected, to be operated from inside (walk-in type) or outside (non-walk-in type) for alternating current of rated voltages above 1 kV and up to and including 52 kV on the high voltage side, and for one or more transformers for service frequencies up to and including 60 Hz for outdoor installation at locations with public accessibility and where protection of personnel is provided.

Prefabricated substations can be situated at ground level or partially or completely below ground level.

In general a prefabricated substation comprises an enclosure containing the following electrical components:

- power transformers;
- high voltage and low voltage switchgear and controlgear;
- high voltage and low voltage interconnections;
- auxiliary equipment and circuits.

However, relevant provisions of this standard are applicable to designs where not all these electrical components exist (for example, an installation consisting of power transformer and low voltage switchgear).

Non-prefabricated substations should comply with the applicable requirements of IEC 61936-1:2010.

### 1.2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
