------------	---	--

Consumer audio/video equipment - Digital interface - Part 6: Audio and music data transmission protocol

Táto norma obsahuje anglickú verziu európskej normy.
This standard includes the English version of the European Standard.

Táto norma bola oznámená vo Vestníku ÚNMS SR č. 03/15

Obsahuje: EN 61883-6:2014, IEC 61883-6:2014

Oznámením tejto normy sa od 08.10.2017 ruší
STN EN 61883-6 (36 8555) z augusta 2006

120303

Úrad pre normalizáciu, metrológiu a skúšobníctvo SR, odbor SÚTN, 2015
Podľa zákona č. 264/1999 Z. z. v znení neskorších predpisov sa môžu slovenské technické normy rozmnožovať a rozširovať iba so súhlasom Úradu pre normalizáciu, metrológiu a skúšobníctvo SR.

Audio-Video-Geräte der Unterhaltungselektronik - Digitale
Schnittstelle - Teil 6: Übertragungsprotokoll für Ton- und
Musikdaten
(IEC 61883-6:2014)

This European Standard was approved by CENELEC on 2014-10-08. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Foreword

The text of document 100/2341/FDIS, future edition 3 of IEC 61883-6, prepared by Technical Area 4 "Digital system interfaces and protocols" of IEC/TC 100 "Audio, video and multimedia systems and equipment" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN 61883-6:2014.

The following dates are fixed:

- latest date by which the document has to be (dop) 2015-07-08
implemented at national level by
publication of an identical national
standard or by endorsement
- latest date by which the national (dow) 2017-10-08
standards conflicting with the
document have to be withdrawn

This document supersedes EN 61883-6:2005.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

Endorsement notice

The text of the International Standard IEC 61883-6:2014 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 60958-4	NOTE	Harmonized as EN 60958-4.
IEC 61883-6:2002	NOTE	Harmonized as EN 61883-6:2002 (not modified).

Annex ZA (normative)

Normative references to international publications with their corresponding European publications

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 When an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: www.cenelec.eu

About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in 14 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

More than 55 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

CONTENTS

FOREWORD.....	11
1 Scope.....	13
2 Normative references	13
3 Terms, definitions and abbreviations	13
3.1 Terms and definitions.....	13
3.2 Abbreviations.....	15
4 Reference model for data transmission.....	16
4.1 General.....	16
4.2 Application layer	17
4.3 Adaptation layer.....	17
4.4 Packetization layer.....	18
5 Transport requirements	19
5.1 Arbitrated short bus reset.....	19
5.2 Bit, byte, and quadlet ordering	19
6 Packet header for audio and music data	19
6.1 General.....	19
6.2 Isochronous packet header format	19
6.3 CIP header format	19
7 Packetization.....	20
7.1 Packet transmission method	20
7.2 Transmission of timing information.....	20
7.3 Time stamp processing	21
7.4 Transmission control.....	21
7.4.1 Non-blocking transmission method	21
7.4.2 Blocking transmission method	23
8 Event types	24
8.1 General.....	24
8.2 AM824 data	27
8.2.1 Generic format.....	27
8.2.2 IEC 60958 conformant data	29
8.2.3 Multi-bit linear audio (MBLA)	29
8.2.4 One-bit audio.....	30
8.2.5 MIDI conformant data	31
8.2.6 SMPTE time code data	32
8.2.7 Sample count data.....	32
8.2.8 High-precision multi-bit linear audio.....	32
8.2.9 Ancillary data.....	33
8.2.10 Application specific ancillary data	35
8.3 32-bit floating-point data	35
8.4 24-bit × 4 audio pack	36
8.5 32-bit generic data.....	36
9 FDF definition	36
9.1 Overview	36
9.2 Basic format.....	37
9.3 Special format.....	39

10	FDF definition for AM824 data	39
10.1	Definition of N-flag	39
10.2	Supplementary SFC definition	39
10.3	Clock-based rate control mode (FDF = 0000 0xxx ₂)	40
10.3.1	Introductory remark	40
10.3.2	Default SFC table for (FDF = 0000 0xxx ₂)	40
10.4	Command-based rate control mode (FDF = 00001xxx ₂)	41
10.4.1	Introductory remark	41
10.4.2	Default SFC table for (FDF = 0000 1xxx ₂)	42
11	AM824 adaptation process	42
11.1	Introductory remark	42
11.2	Basic sequence conversion	42
11.3	Sequence multiplexing	43
11.4	Compound data block structure	43
11.4.1	General	43
11.4.2	Compound data structure rule	44
12	AM824 sequence adaptation layers	47
12.1	Overview	47
12.1.1	General	47
12.1.2	IEC 60958 bitstream	47
12.1.3	One-bit audio	53
12.1.4	Non-linear audio data stream	56
12.1.5	MIDI data stream	56
12.1.6	SMPTE time code and sample count	57
12.1.7	High-precision and double-precision multi-bit linear audio	57
12.2	DVD-audio	62
12.2.1	General	62
12.2.2	DVD-Audio specific ancillary data	62
12.2.3	Data for CCI	64
12.2.4	Data for ISRC	64
12.2.5	Example of DVD-Audio stream	64
12.3	SACD definition	66
12.3.1	General	66
12.3.2	SACD ancillary data	66
12.3.3	SACD supplementary data	67
12.3.4	Multi-bit linear audio data	68
12.3.5	SACD Track_Mode&Flags data	68
12.3.6	SACD Track_Copy_Management data	68
12.3.7	Example of SACD streams	68
12.4	Blu-ray Disc	70
12.4.1	General	70
12.4.2	Structure of sample word for audio transmission	70
12.4.3	Multi-bit linear audio data	71
12.4.4	Blu-ray Disc specific ancillary data	71
12.4.5	Data transmitted at every data block	71
12.4.6	Data for CCI	74
12.4.7	Example of Blu-ray Disc stream	75
12.5	Multi-bit linear audio (MBLA)	79
12.5.1	General	79

12.5.2	Structure of sample word for audio transmission	79
12.5.3	Fixed channels' structure of sample word for audio transmission	79
12.5.4	Variable channels' structure of sample word for audio transmission	81
12.5.5	MBLA data	83
12.5.6	MBLA specific ancillary data	83
12.5.7	Data transmitted at every data block of Group 1 for the fixed channels' structure	83
12.5.8	Data transmitted at every data block of Group 2 for the fixed channels' structure	86
12.5.9	Data transmitted at every data block of Group 3 for the fixed channels' structure	88
12.5.10	Data transmitted at every data block of Group 4 for the fixed channels' structure	91
12.5.11	Data transmitted at every data block for the variable channels' structure	93
12.5.12	Data transmitted at extension channel bit order 1 for the variable channels' structure	96
12.5.13	Data transmitted at extension channel bit order 2 for the variable channels' structure	100
12.5.14	Data for CCI	102
12.5.15	Example of MBLA stream for the fixed channels' structure	103
12.5.16	Example of MBLA stream for the variable channels' structure	105
Annex A (informative)	Synchronization issues	108
A.1	General	108
A.2	Delivery of sampling clock of arbitrary frequency	108
Annex B (informative)	Catching up in non-blocking transmission method	110
Annex C (informative)	Transport characteristics	111
C.1	Sampling-clock jitter characteristics	111
C.2	Sample clock transfer jitter mechanisms using A/M protocol	111
C.2.1	General	111
C.2.2	CYCLE_TIME register jitter	111
C.2.3	Time-stamp quantization jitter	112
C.3	Embedded sample-clock jitter	113
C.3.1	Embedded sample-clock jitter spectrum	113
C.3.2	Embedded sample-clock jitter amplitude	113
C.4	Jitter attenuation	116
C.5	Jitter measurement	116

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**CONSUMER AUDIO/VIDEO EQUIPMENT –
DIGITAL INTERFACE –****Part 6: Audio and music data transmission protocol****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61883-6 has been prepared by technical area 4: Digital system interfaces and protocols, of IEC technical committee 100: Audio, video and multimedia systems and equipment.

This third edition cancels and replaces the second edition, published in 2005, and constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) AM824 sequence adaptation layer for Blu-ray Disc application is added.
- b) Blocking transmission method becomes normative.
- c) Previously defined protocols have been included for the sake of backwards compatibility.

The text of this standard is based on the following documents:

FDIS	Report on voting
100/2341/FDIS	100/2372/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the IEC 61883 series, published under the general title *Consumer audio/video equipment – Digital interface*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

CONSUMER AUDIO/VIDEO EQUIPMENT – DIGITAL INTERFACE –

Part 6: Audio and music data transmission protocol

1 Scope

This part of IEC 61883 describes a protocol for the transmission of audio and music data employing IEEE 1394 and specifies essential requirements for the application of the protocol.

This protocol can be applied to all modules or devices that have any kind of audio and/or music data processing, generation and conversion function blocks. This standard deals only with the transmission of audio and music data. The control, status and machine-readable description of these modules or devices should be defined outside of this standard according to each application area.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60958 (all parts), *Digital audio interface*

IEC 60958-3, *Digital audio interface – Part 3: Consumer applications*

IEC 61883-1, *Consumer audio/video equipment – Digital interface – Part 1: General*

IEEE 754:1985, *Standard for Binary Floating-Point Arithmetic*

IEEE 1394, *Standard for a High Performance Serial Bus*

IEEE 1394A, *Standard for a High Performance Serial Bus – Amendment 1*
