Space product assurance - Mechanical testing of metallic materials

Táto norma obsahuje anglickú verziu európskej normy.  
This standard includes the English version of the European Standard.

Táto norma bola oznámená vo Vestníku ÚNMS SR č. 03/15

Obsahuje: EN 16602-70-45:2014

**120362**

Úrad pre normalizáciu, metrológiu a skúšobníctvo SR, odbor SÚTN, 2015  
Podľa zákona č. 264/1999 Z. z. v znení neskorších predpisov sa môžu slovenské technické normy  
rozmnožovať a rozširovať iba so súhlasom Úradu pre normalizáciu, metrológiu a skúšobníctvo SR.

October 2014

ICS 49.025.01; 49.140

English version

## Space product assurance - Mechanical testing of metallic materials

Assurance produit des projets spatiaux - Essais mécaniques des matériaux métalliques

Raumfahrtproduksicherung - Mechanische Tests von metallenem Material

This European Standard was approved by CEN on 18 October 2014.

CEN and CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN and CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN and CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

<b>Foreword .....</b>	<b>5</b>
<b>1 Scope.....</b>	<b>6</b>
<b>2 Normative references.....</b>	<b>7</b>
<b>3 Terms, definitions and abbreviated terms.....</b>	<b>9</b>
3.1 Terms defined in other standards .....	9
3.2 Terms specific to the present standard .....	9
3.3 Abbreviated terms.....	10
3.4 Symbols.....	11
<b>4 Principles .....</b>	<b>12</b>
4.1 Overview .....	12
4.2 Tensile test .....	12
4.3 Fracture toughness test .....	12
4.3.1 Overview.....	12
4.3.2 Determination of fracture toughness using the $K_{Ic}$ test method.....	12
4.3.3 Determination of fracture toughness using the $J_{Ic}$ test method .....	13
4.3.4 Characterization of fracture toughness using the R-curve test method.....	13
4.3.5 Characterization of fracture toughness using the CTOD test method .....	13
4.4 Fatigue test.....	14
4.4.1 General.....	14
4.4.2 Force controlled constant amplitude axial fatigue test .....	14
4.4.3 Strain-controlled fatigue test.....	14
4.5 Fatigue crack propagation test.....	14
4.5.1 Stable crack growth rate.....	14
4.5.2 Crack propagation threshold .....	15
4.6 Fracture and fatigue test in special environment.....	15
4.7 Stress corrosion cracking test.....	15
4.7.1 Overview.....	15
4.7.2 Stress corrosion cracking test using smooth specimens .....	15
4.7.3 Stress corrosion cracking test using pre-cracked specimens .....	16

4.8 Creep test.....	16
4.9 Test results presentation.....	16
<b>5 Requirements.....</b>	<b>17</b>
5.1 Customer agreement .....	17
5.2 Tensile testing .....	17
5.2.1 General.....	17
5.2.2 Tensile testing of weldments .....	17
5.3 Fracture toughness test .....	18
5.3.1 $K_{Ic}$ test method .....	18
5.3.2 $J_{Ic}$ test method.....	18
5.3.3 R-curve test method.....	18
5.3.4 CTOD test method .....	18
5.4 Fatigue test.....	19
5.4.1 Force controlled constant amplitude axial fatigue test .....	19
5.4.2 Strain-controlled fatigue test.....	19
5.5 Fatigue crack propagation test.....	20
5.5.1 Determination of fatigue crack growth rate .....	20
5.5.2 Determination of a fatigue crack propagation threshold.....	20
5.6 Fracture and fatigue tests in special environments .....	21
5.7 Stress corrosion cracking test.....	21
5.7.1 Stress corrosion cracking test using smooth specimens .....	21
5.7.2 Stress corrosion cracking test using pre-cracked specimens .....	21
5.8 Creep test.....	21
5.9 Evaluation of test results.....	21
5.10 Storage.....	22
5.11 Reporting.....	22
5.12 Quality assurance .....	22
5.12.1 General.....	22
5.12.2 Calibration.....	22
5.12.3 Quality control of raw materials .....	23
5.12.4 Nonconformance.....	23
5.12.5 Traceability and records .....	23
<b>Annex A (normative) Request for mechanical testing of materials – DRD.....</b>	<b>24</b>
<b>Annex B (normative) Proposal for mechanical testing of materials – DRD.....</b>	<b>26</b>
<b>Annex C (normative) Report of mechanical testing of materials – DRD.....</b>	<b>28</b>

<b>Annex D (informative) References .....</b>	<b>31</b>
<b>Bibliography.....</b>	<b>32</b>

## **Foreword**

---

This document (EN 16602-70-45:2014) has been prepared by Technical Committee CEN/CLC/TC 5 "Space", the secretariat of which is held by DIN.

This standard (EN 16602-70-45:2014) originates from ECSS-Q-ST-70-45C.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2015, and conflicting national standards shall be withdrawn at the latest by April 2015.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

This document has been developed to cover specifically space systems and has therefore precedence over any EN covering the same scope but with a wider domain of applicability (e.g. : aerospace).

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

**1****Scope**

---

This Standard specifies requirements for mechanical testing of metallic materials to be used in the fabrication of spacecraft hardware.

This Standard establishes the requirements for most relevant test methods carried out to assess the tensile, fatigue and fracture properties of metallic materials. It does not give a complete review of all the existing test methods for the evaluation of mechanical properties of metallic materials.

Furthermore, this Standard specifies requirements for the evaluation, presentation and reporting of test results.

This standard may be tailored for the specific characteristic and constraints of a space project in conformance with ECSS-S-ST-00.

**2****Normative references**

The following normative documents contain provisions which, through reference in this text, constitute provisions of this ECSS Standard. For dated references, subsequent amendments to, or revision of any of these publications do not apply. However, parties to agreements based on this ECSS Standard are encouraged to investigate the possibility of applying the more recent editions of the normative documents indicated below. For undated references, the latest edition of the publication referred to applies.
