Sanitärarmaturen für Wasserversorgungssysteme vom Typ
1 und Typ 2 - Allgemeine technische Spezifikation

This European Standard was approved by CEN on 10 November 2012 and includes Amendment 1 approved by CEN on 9 September 2014.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Foreword

This document (EN 16146:2012+A1:2014) has been prepared by Technical Committee CEN/TC 164 "Water supply", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2015, and conflicting national standards shall be withdrawn at the latest by May 2015.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document includes Amendment 1 approved by CEN on 9 September 2014.

This document supersedes EN 16146:2012.

The start and finish of text introduced or altered by amendment is indicated in the text by tags **[A1]** **[A1]**.

According to the CEN/CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Introduction

In respect of potential adverse effects on the quality of water intended for human consumption caused by the product covered by this standard, this standard provides no information as to whether the product may be used without restriction in any of the Member States of the EU or EFTA.

It should be noted that, while awaiting the adoption of verifiable European criteria, existing national regulations concerning the use and/or the characteristics of this product remain in force.

1 Scope

This European Standard applies to hoses for extractable outlets of any material intended for equipping sanitary tapware for sinks and basins. Such hoses will only be connected downstream of the obturator of the tapware. The tapware will comply with EN 200, EN 817, EN 1111, EN 1286 or EN 1287 (see [1], [2], [3], [5] and [6]).

Hoses intended to connect sanitary tapware to the water supplies are not covered by this standard.

This European Standard specifies:

- the dimensional, mechanical and hydraulic characteristics with which the hose for extractable outlets shall comply;
- the procedures for testing these characteristics.

Details of pressures and temperatures are given in Table 1.

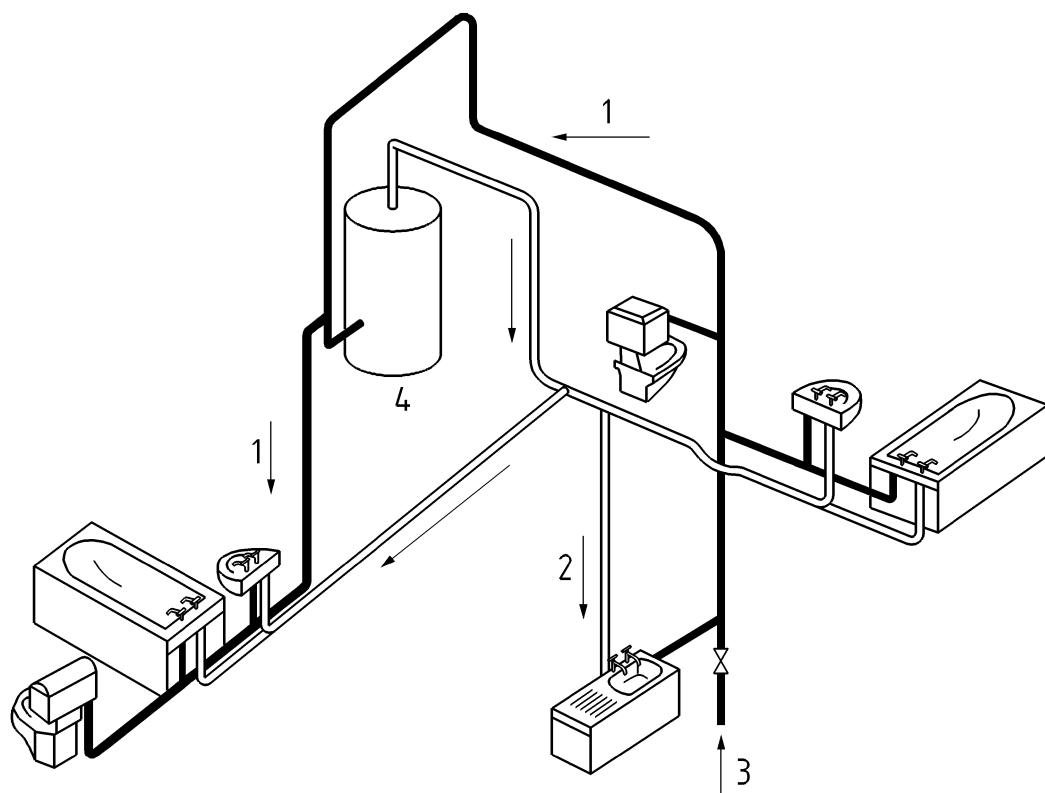

A1

Table 1 — Conditions of use/Classifications

Water supply system	Operating range of hoses for extractable outlets		Flow rates (Q) ^a
	Limits	Recommended	
Type 1 see Figure 1	<u>Dynamic Pressure</u> 0,05 MPa ≤ P ≤ 0,5 MPa (0,5 bar ≤ P ≤ 5 bar)	<u>Dynamic Pressure</u> 0,1 MPa to 0,3 MPa (1,0 bar to 3,0 bar)	Class 1: $Q \geq 0,25 \text{ l/s (15 l/min)}$
			Class 2: $Q \geq 0,15 \text{ l/s (9 l/min)}$
Type 2 see Figure 2	<u>Dynamic Pressure</u> 0,01 MPa to 0,2 MPa (0,1 bar to 2,0 bar)	<u>Dynamic Pressure</u> 0,02 MPa to 0,10 MPa (0,2 bar to 1,0 bar)	Class E: $0,06 \text{ l/s} < Q < 0,18 \text{ l/s}$ $(3,6 \text{ l/min} < Q < 10,8 \text{ l/min.})$
Temperature	$T \leq 70^\circ\text{C}$	$T \leq 60^\circ\text{C}$	Class H: $0,18 \text{ l/s} \leq Q (10,8 \text{ l/min} \leq Q)$

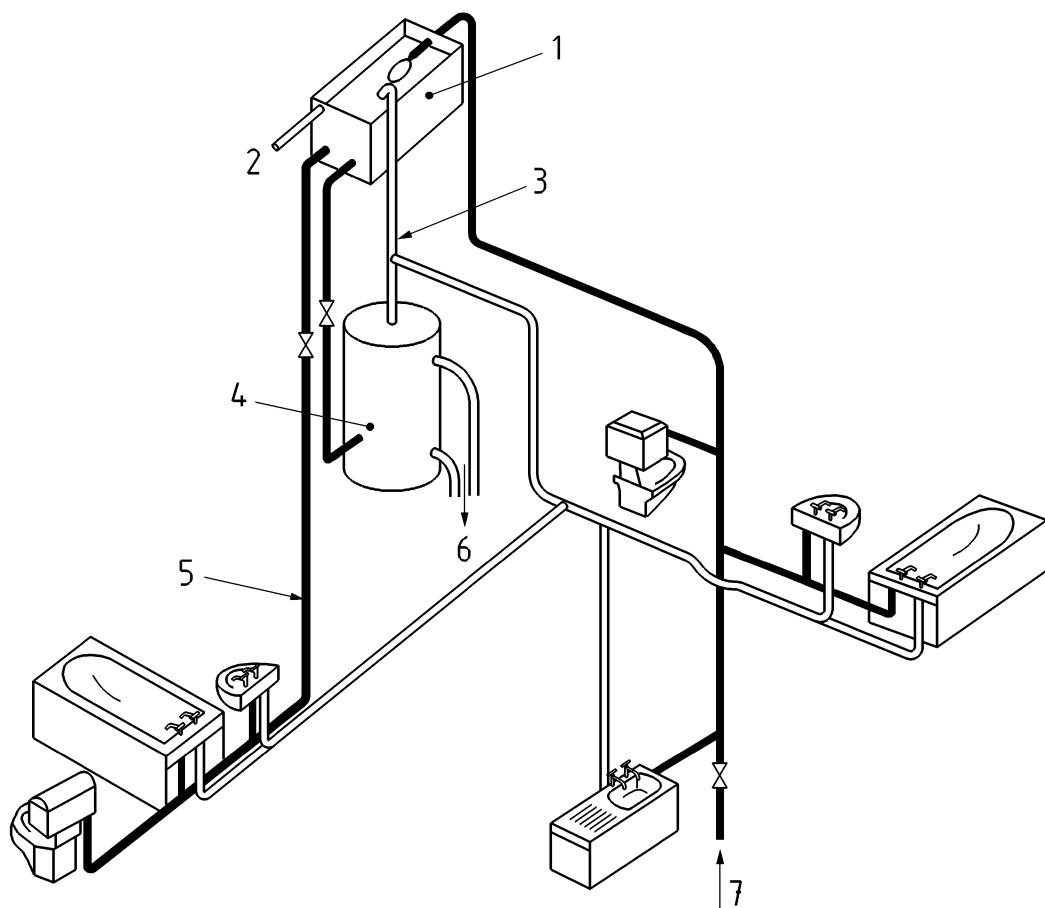

^a See details in Table 3.

A1

**Key**

- 1 cold water
- 2 hot water
- 3 mains supply pipe (Supply pressures up to 1,0 MPa (10 bar))
- 4 water heater

Figure 1 — Type 1 – Supply system - with a pressure range of 0,05 MPa to 1,0 MPa (0,5 bar to 10 bar)

**Key**

- 1 cold water storage cistern (cover omitted for clarity)
- 2 warning pipe
- 3 vent pipe
- 4 hot water cylinder
- 5 alternative cistern fed cold supply to sanitary appliances
- 6 to boiler
- 7 mains supply pipe (Supply pressures up to 1,0 MPa (10 bar))

**Figure 2 — Type 2-Supply system - with a pressure range of 0,01 MPa to 1,0 MPa, (0,1 bar to 10 bar):
A vented domestic hot water and cold water supply system incorporating gravity hot water, mains
cold water and alternative gravity cold water supply to sanitary appliances**

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
