## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2, [www.iso.org/directives](http://www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received, [www.iso.org/patents](http://www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 34, *Food Products*, Subcommittee SC 4, *Cereals and pulses*.

This third edition cancels and replaces the second edition (ISO 5527:1995), which has been technically revised.

## Introduction

In this edition of ISO 5527, the terms and definitions have been stored in the Online Browsing Platform (OBP) (<http://www.iso.org/obp>), where they can be browsed free of charge by members of the public (but not downloaded) in the following languages: English, French, German and Spanish.

The PDF version of ISO 5527 also contains the terms and definitions in Chinese.

# Cereals — Vocabulary

## 1 Scope

This International Standard defines terms relating to cereals.

NOTE 1 In addition to terms used in English and French, two of the three official ISO languages, this document gives the equivalent terms in Spanish, German and Chinese; these are published under the responsibility of the member bodies for Argentina (IRAM), Germany (DIN) and China (SAC) and are given for information only. Only the terms and definitions given in the official languages can be considered as ISO terms and definitions.

The terms are given under the following subheadings:

- [2.1](#) General terms
- [2.2](#) Terms relating to physiology
- [2.3](#) Terms relating to morphology
- [2.4](#) Terms relating to technology of cereals
- [2.5](#) Terms relating to cereal products
- [2.6](#) Terms relating to test and sampling methods

NOTE 2 See ISO 5526[6] for a list of principal cereal species with their botanic names and common names.
