Qualitätsmanagementsysteme der Luft- und Raumfahrt

This European Standard was approved by CEN on 17 December 2015.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 9104-002:2016) has been prepared by the Aerospace and Defence Industries Association of Europe - Standardization (ASD-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of ASD, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by December 2016, and conflicting national standards shall be withdrawn at the latest by December 2016.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 9104-002:2008.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

RATIONALE

After the initial publication of International Aerospace Quality Group (IAQG) standard EN 9104 in 2004, it became evident that a single standard containing all aspects of the Industry Controlled Other Party (ICOP) Aerospace Quality Management System (AQMS) was too complex. It was decided that the standard be broken into three sections:

- EN 9104-001 – Requirements for Aviation, Space, and Defence Quality Management System Certification Programs;
- EN 9104-002 – Requirements for Oversight of Aerospace Quality Management System Registration/Certification Programs; and
- EN 9104-003 – Requirements for Aerospace Auditor Competency and Training Courses.

This document is written to define a robust shared oversight process to ensure conformance to established aviation, space, and defence industry EN 9100-series accreditation/certification requirements. The purpose of this revision is to align with the respective EN 9104-001 and EN 9104-003 standards and incorporate lessons learned from past oversight activities.

FOREWORD

In December 1998, the aviation, space, and defence industry established the IAQG with the goal of achieving significant improvements in quality and reductions in cost throughout the value stream.

This document details the operating processes of the IAQG Other Party Management Team (OPMT) that monitors and reviews the Aerospace Supplier Quality System Accreditation/Certification Programs of each Sector Management Structure (SMS).

This document provides requirements for a shared oversight process based on the:

- establishment of oversight committees at the international and global sector levels;
- use of joint team assessments;
- use of qualified and approved IAQG member Other Party (OP) assessors;
- use of common assessment tools; and
- reporting of oversight results.

This document addresses the following activities:

- a) Establishment of standard oversight processes in all three global sectors (i.e., Europe, Asia Pacific, and the Americas). The management of these global sector schemes is referred to as SMS.
- b) Oversight of SMS, Certification Body Management Committees (CBMCs), Accreditation Bodies (ABs), Certification Bodies (CBs), Auditor Authentication Bodies (AABs), Training Provider Approval Bodies (TPABs), and training classes.

1 Scope

The requirements established in this document are applicable to the IAQG and associated sectors for managing oversight to established requirements contained in EN 9104-series standards (i.e., EN 9104-001, EN 9104-002, EN 9104-003). The requirements are applicable to IAQG working groups for oversight.

NOTE All required forms are depicted in Appendix A. These form exhibits are provided for reference only; the current versions of these forms are available on the IAQG website.

1.1 Purpose

The purpose of this standard is to document the ICOP oversight process and define a robust shared oversight process which provides objective evidence of conformance to established aerospace industry EN 9100-series standards (i.e., EN 9100, EN 9110, EN 9120) requirements and associated accreditation/certification.
