## Services for fire safety systems and security systems

Prestations de services pour les systèmes de sécurité  
incendie et les systèmes de sûreté

Dienstleistungen für Brandsicherheitsanlagen und  
Sicherheitsanlagen

This European Standard was approved by CEN on 23 October 2016.

CEN and CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN and CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN and CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## **European foreword**

This document (EN 16763:2017) has been prepared by Technical Committee CEN-CENELEC/TC 4 “Services for fire safety and security systems”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 2017, and conflicting national standards shall be withdrawn at the latest by July 2017.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Introduction

Many national and regional authorities and organizations within Europe publish services standards for the planning, design, installation, commissioning, verification, handover or maintenance of fire safety systems and/or security systems. This European Standard is intended to create a common understanding for a minimum service level by establishing criteria for the service level of service providers, the involved staff and the output of services provided.

The European Parliament and the Council passed into law on 2006-12-12 the directive 2006/123/EC “Services in the internal market” (SD). This Service Directive establishes general provisions facilitating service providers the freedom of establishment and the free movement of services within the EU, while maintaining a high quality of services (SD, Article 1-1). The SD states in Article 26 for a “Policy on Quality of Services” to enhance qualified service compatibility between the Member States. This European Standard was prepared to support the intention of Article 26-5 of the SD.

This European Standard does not replace the work of other CEN/CENELEC committees such as CEN/TC 72, CLC/TC 79 and CEN/TC 191. It should be read in conjunction with their standards and application guidelines for the use of their products and systems. Only services for the systems within the scopes of CEN/TC 72, CLC/TC 79 and CEN/TC 191 are covered in this European Standard with the exceptions defined in the scope.

This European Standard is intended to be applied in conjunction with application guidelines, either European (if any) or national, as well as with national laws and regulations in the field of expertise and can be used as the basis for establishing certification schemes for declared services but is not intended to be applied on its own as a certification scheme.

Figure 1 shows the position of this European Standard within the relevant European Standards framework.

Having all parts of Figure 1 will help to achieve a consistent implementation of this European Standard.

**General SERVICE PROVIDER REQUIREMENTS for all fields of expertise**

**Standard “Services for fire safety systems and security systems”**

- Organization
- Management
- Staff
- Resources
- Procedures
- Documentation

+

**Management System**

The service provider uses a Management System (e.g. ISO 9001).

**Different APPLICATION REQUIREMENTS in the fields of expertise**

**Application Guidelines**

Covering planning, design, installation, commissioning, verification, handover and maintenance.

Each sector of fire safety systems or security systems may have their own application guidelines which will give the requirements to enable service provider personnel to plan, design, install, commission, verify, handover and maintain a system.

**Different PRODUCT & SYSTEM REQUIREMENTS for a field of expertise**

**Product Standards**

Each sector may have standard(s) for products called up in the product standards.

**System Standards**

Each sector may have system standard(s) specifying the requirements and performance requirements of the system.

**Figure 1 — Position of this European Standard within European Standards framework**

## 1 Scope

This European Standard specifies the minimum requirements for service providers as well as the competencies, knowledge and skills of their involved staff charged with the planning, design, installation, commissioning, verification, handover or maintenance of fire safety systems and/or security systems, regardless whether these services are provided on-site or remotely.

This European Standard is applicable to services for:

- a) fire safety systems including, but not limited to, fire detection and fire alarm systems, fixed firefighting systems and smoke and heat control systems;
- b) security systems including, but not limited to, intruder and hold-up alarm systems, access control systems, external perimeter security systems and video surveillance systems;
- c) a combination of such systems including those parts of an alarm transmission system for which the service provider has contractually accepted responsibility.

Social alarm systems and alarm receiving centres are not included.

This European Standard is applicable regardless of project size.

This European Standard is applicable regardless of the service provider's organizational structure and size.
