Specification for radio disturbance and immunity measuring apparatus and methods - Part 2-3: Methods of measurement of disturbances and immunity - Radiated disturbance measurements

Táto norma obsahuje anglickú verziu európskej normy.
This standard includes the English version of the European Standard.

Táto norma bola oznámená vo Vestníku ÚNMS SR č. 09/17

Obsahuje: CISPR 16-2-3:2016, EN 55016-2-3:2017

Oznámením tejto normy sa od 28.04.2020 ruší
STN EN 55016-2-3 (33 4216) z októbra 2010

125478

Úrad pre normalizáciu, metrológiu a skúšobníctvo Slovenskej republiky, 2017
Podľa zákona č. 264/1999 Z. z. o technických požiadavkách na výrobky a o posudzovaní zhody a o zmene a doplnení niektorých zákonov v znení neskorších predpisov sa slovenská technická norma a časti slovenskej technickej normy môžu rozmnožovať alebo rozširovať len so súhlasom slovenského národného normalizačného orgánu.

This European Standard was approved by CENELEC on 2016-10-20. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword

The text of document CISPR/A/1176A/FDIS, future edition 4 of CISPR 16-2-3, prepared by CISPR SC A "Radio-Interference measurements and statistical methods" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN 55016-2-3:2017.

The following dates are fixed:

- latest date by which the document has to be (dop) 2017-10-28
implemented at national level by
publication of an identical national
standard or by endorsement
- latest date by which the national (dow) 2020-04-28
standards conflicting with the
document have to be withdrawn

This document supersedes EN 55016-2-3:2010.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

Endorsement notice

The text of the International Standard CISPR 16-2-3:2016 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

CISPR 11:2015	NOTE	Harmonized as EN 55011:2016.
CISPR 16-1-6:2014	NOTE	Harmonized as EN 55016-1-6:2015.
CISPR 22:2008	NOTE	Harmonized as EN 55022:2010.
IEC 61140:2016	NOTE	Harmonized as EN 61140:2016.
ISO/IEC Guide 2:2004	NOTE	Harmonized as EN 45020:2006.
ISO/IEC 17000:2004	NOTE	Harmonized as EN ISO/IEC 17000:2004.
IEC 61000-4-21	NOTE	Harmonized as EN 61000-4-21.

Annex ZA

(normative)

**Normative references to international publications
with their corresponding European publications**

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 When an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: www.cenelec.eu.

About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 15 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - www.iec.ch/searchpub

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 15 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

65 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc

1 Scope.....	9
2 Normative references	9
3 Terms, definitions and abbreviations	10
3.1 Terms and definitions	10
3.2 Abbreviated terms	15
4 Types of disturbance to be measured	16
4.1 General.....	16
4.2 Types of disturbance	16
4.3 Detector functions	16
5 Connection of measuring equipment	16
6 General measurement requirements and conditions.....	17
6.1 General.....	17
6.2 Disturbance not produced by the equipment under test	17
6.2.1 General.....	17
6.2.2 Compliance (conformity assessment) testing.....	17
6.3 Measurement of continuous disturbance	17
6.3.1 Narrowband continuous disturbance	17
6.3.2 Broadband continuous disturbance	17
6.3.3 Use of spectrum analyzers and scanning receivers	17
6.4 EUT arrangement and measurement conditions	18
6.4.1 General arrangement of the EUT	18
6.4.2 Operation of the EUT	20
6.4.3 EUT time of operation	20
6.4.4 EUT running-in time	21
6.4.5 EUT supply	21
6.4.6 EUT mode of operation.....	21
6.4.7 Operation of multifunction equipment.....	21
6.4.8 Determination of arrangement(s) causing maximum emissions	21
6.4.9 Recording of measurements	21
6.5 Interpretation of measuring results	22
6.5.1 Continuous disturbance	22
6.5.2 Discontinuous disturbance.....	22
6.5.3 Measurement of the duration of disturbance.....	22
6.6 Measurement times and scan rates for continuous disturbance	22
6.6.1 General.....	22
6.6.2 Minimum measurement times	23
6.6.3 Scan rates for scanning receivers and spectrum analyzers.....	23
6.6.4 Scan times for stepping receivers	24
6.6.5 Strategies for obtaining a spectrum overview using the peak detector.....	25
6.6.6 Timing considerations using FFT-based instruments	29
7 Measurement of radiated disturbances	32
7.1 Introductory remarks	32
7.2 Loop-antenna system measurements (9 kHz to 30 MHz)	33
7.2.1 General.....	33
7.2.2 General measurement method.....	33

7.2.3	Test environment	34
7.2.4	Configuration of the equipment under test.....	35
7.2.5	Measurement uncertainty for LAS	35
7.3	Open-area test site or semi-anechoic chamber measurements (30 MHz to 1 GHz)	35
7.3.1	Measurand	35
7.3.2	Test site requirements	38
7.3.3	General measurement method	38
7.3.4	Measurement distance	39
7.3.5	Antenna height variation	40
7.3.6	Product specification details	40
7.3.7	Measurement instrumentation	42
7.3.8	Field-strength measurements on other outdoor sites	42
7.3.9	Measurement uncertainty for OATS and SAC	42
7.4	Fully-anechoic room measurements (30 MHz to 1 GHz)	42
7.4.1	Test set-up and site geometry	42
7.4.2	EUT position	45
7.4.3	Cable layout and termination	46
7.4.4	Measurement uncertainty for FAR	47
7.5	Radiated emission measurement method (30 MHz to 1 GHz) and radiated immunity test method (80 MHz to 1 GHz) with common test set-up in semi-anechoic chamber	47
7.5.1	Applicability	47
7.5.2	EUT perimeter definition and antenna-to-EUT separation distance	47
7.5.3	Uniform test volume	48
7.5.4	Specifications for EUT set-up in common emissions/immunity test set-up	49
7.5.5	Measurement uncertainty for common emission/immunity set-up and method	55
7.6	Fully-anechoic room and absorber-lined OATS/SAC measurements (1 GHz to 18 GHz)	55
7.6.1	Quantity to measure	55
7.6.2	Measurement distance	55
7.6.3	Set-up and operating conditions of the equipment under test (EUT)	56
7.6.4	Measurement site	56
7.6.5	Measurement instrumentation	56
7.6.6	Measurement procedure	57
7.6.7	Measurement uncertainty for FAR	63
7.7	<i>In situ</i> measurements (9 kHz to 18 GHz)	64
7.7.1	Applicability of and preparation for <i>in situ</i> measurements	64
7.7.2	Field-strength measurements <i>in situ</i> in the frequency range 9 kHz to 30 MHz	65
7.7.3	Field-strength measurements <i>in situ</i> in the frequency range above 30 MHz	65
7.7.4	<i>In situ</i> measurement of the disturbance effective radiated power using the substitution method	66
7.7.5	Documentation of the measurement results	70
7.7.6	Measurement uncertainty for <i>in situ</i> method	70
7.8	Substitution measurements (30 MHz to 18 GHz)	70
7.8.1	General	70
7.8.2	Test site	71

7.8.3	Test antennas	71
7.8.4	EUT configuration	72
7.8.5	Test procedure	72
7.8.6	Measurement uncertainty for substitution method	72
7.9	Reverberation chamber measurements (80 MHz to 18 GHz)	72
7.10	TEM waveguide measurements (30 MHz to 18 GHz)	72
8	Automated measurement of emissions	72
8.1	Introduction – Precautions for automated measurements	72
8.2	Generic measurement procedure	73
8.3	Pre-scan measurements	73
8.3.1	General	73
8.3.2	Determination of the required measurement time	74
8.3.3	Pre-scan requirements for different types of measurements	74
8.4	Data reduction	75
8.5	Emission maximization and final measurement	76
8.6	Post-processing and reporting	77
8.7	Emission measurement strategies with FFT-based measuring instruments	77
Annex A (informative)	Measurement of disturbances in the presence of ambient emissions	78
A.1	General	78
A.2	Terms and definitions	78
A.3	Problem description	78
A.4	Proposed solution	78
A.4.1	Overview	78
A.4.2	Pre-testing the EUT in a shielded room	81
A.4.3	Method of measurement of EUT disturbances in the presence of narrowband ambient emissions	82
A.4.4	Method of measurement of EUT disturbance in the presence of broadband ambient emissions	85
A.5	Determination of the EUT disturbance in case of superposition	87
Annex B (informative)	Use of spectrum analyzers and scanning receivers	92
B.1	General	92
B.2	Overload	92
B.3	Linearity test	92
B.4	Selectivity	92
B.5	Normal response to pulses	92
B.6	Peak detection	92
B.7	Frequency scan rate	93
B.8	Signal interception	93
B.9	Average detection	93
B.10	Sensitivity	93
B.11	Amplitude accuracy	94
Annex C (informative)	Scan rates and measurement times for use with the average detector	95
C.1	Purpose	95
C.2	Suppression of disturbances	95
C.2.1	Suppression of impulsive disturbance	95
C.2.2	Suppression of impulsive disturbance by digital averaging	96
C.2.3	Suppression of amplitude modulation	96

C.3	Measurement of slowly intermittent, unsteady or drifting narrowband disturbances	96
C.4	Recommended procedure for automated or semi-automated measurements	98
Annex D (informative)	Explanation of the APD measurement method applying to the compliance test	99
Annex E (normative)	Determination of suitability of spectrum analyzers for compliance tests	101

Radiated disturbance measurements**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard CISPR 16-2-3 has been prepared by CISPR subcommittee A: Radio-interference measurements and statistical methods.

This fourth edition edition cancels and replaces the third edition published in 2010, its Amendment 1:2010 and its Amendment 2:2014. This edition constitutes a technical revision.

This edition includes the following significant technical change with respect to the previous edition: addition of content on correction of the electric field strength to account for phase centre of log-periodic dipole array antennas.

It has the status of a basic EMC publication in accordance with IEC Guide 107, *Electromagnetic compatibility – Guide to the drafting of electromagnetic compatibility publications*.

The text of this standard is based on the following documents:

FDIS	Report on voting
CISPR/A/1176A/FDIS	CISPR/A/1182/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the CISPR 16 series, published under the general title *Specification for radio disturbance and immunity measuring apparatus and methods*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

SPECIFICATION FOR RADIO DISTURBANCE AND IMMUNITY MEASURING APPARATUS AND METHODS –

Part 2-3: Methods of measurement of disturbances and immunity – Radiated disturbance measurements

1 Scope

This part of CISPR 16 specifies the methods of measurement of radiated disturbance phenomena in the frequency range of 9 kHz to 18 GHz. The aspects of measurement uncertainty are specified in CISPR 16-4-1 and CISPR 16-4-2.

NOTE In accordance with IEC Guide 107 [13]¹, CISPR 16-2-3 is a basic EMC publication for use by product committees of the IEC. As stated in Guide 107, product committees are responsible for determining the applicability of the EMC standard. CISPR and its subcommittees are prepared to co-operate with product committees in the evaluation of the value of particular EMC tests for specific products.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

CISPR 14-1:2016, *Electromagnetic compatibility – Requirements for household appliances, electric tools and similar apparatus – Part 1: Emission*

CISPR 16-1-1, *Specification for radio disturbance and immunity measuring apparatus and methods – Part 1-1: Radio disturbance and immunity measuring apparatus – Measuring apparatus*

CISPR 16-1-2:2014, *Specification for radio disturbance and immunity measuring apparatus and methods – Part 1-2: Radio disturbance and immunity measuring apparatus – Coupling devices for conducted disturbance measurements*

CISPR 16-1-4:2010, *Specification for radio disturbance and immunity measuring apparatus and methods – Part 1-4: Radio disturbance and immunity measuring apparatus – Antennas and test sites for radiated disturbance measurements*
CISPR 16-1-4:2010/AMD1:2012

CISPR 16-2-1:2014, *Specification for radio disturbance and immunity measuring apparatus and methods – Part 2-1: Methods of measurement of disturbances and immunity – Conducted disturbance measurements*

CISPR TR 16-4-1, *Specification for radio disturbance and immunity measuring apparatus and methods – Part 4-1: Uncertainties, statistics and limit modelling – Uncertainties in standardized EMC tests*

CISPR 16-4-2, *Specification for radio disturbance and immunity measuring apparatus and methods – Part 4-2: Uncertainties, statistics and limit modelling – Measurement instrumentation uncertainty*

¹ Numbers in square brackets refer to the Bibliography.

CISPR TR 16-4-5, *Specification for radio disturbance and immunity measuring apparatus and methods – Part 4-5: Uncertainties, statistics and limit modelling – Conditions for the use of alternative test methods*

IEC 60050-161, *International Electrotechnical Vocabulary – Chapter 161: Electromagnetic compatibility*

IEC 61000-4-3:2006, *Electromagnetic compatibility (EMC) – Part 4-3: Testing and measurement techniques – Radiated, radio-frequency, electromagnetic field immunity test*

IEC 61000-4-3:2006/AMD1:2007

IEC 61000-4-3:2006/AMD2:2010

IEC 61000-4-20, *Electromagnetic compatibility (EMC) – Part 4-20: Testing and measurement techniques – Emission and immunity testing in transverse electromagnetic (TEM) waveguides*
