English Version

## Qualification test of welders - Fusion welding - Part 6: Cast irons

Épreuve de qualification des soudeurs - Soudage par fusion - Partie 6 : Fontes

Prüfung von Schweißern - Schmelzschweißen - Teil 6: Gusseisen

This European Standard was approved by CEN on 22 January 2018.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

**EN 287-6:2018 (E)****European foreword**

This document (EN 287-6:2018) has been prepared by Technical Committee CEN/TC 190 "Foundry Technology", the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2018, and conflicting national standards shall be withdrawn at the latest by October 2018.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 287-6:2010.

Within its programme of work, Technical Committee CEN/TC 190 requested CEN/TC 190/WG 13 "Welding of cast iron" to revise the following standard:

EN 287-6: 2010, *Qualification test of welders — Fusion welding — Part 6: Cast iron*

The following modifications were made:

- Normative references revised;
- Subclause 4.2: Process designations brought in accordance with EN ISO 4063 and welding processes "138" and "143" added;
- Subclause 5.5: Last paragraph revised;
- Subclause 6.5: Table 2 revised;
- Subclause 6.6: Revised and Tables 4 and 5 inserted;
- Subclause 7.4 Table 6: NOTE added;
- Subclause 7.5.2: Tolerances added in Figures 1, 2a), 3, 4a) and 5; "F" and Key added in Figures 2b), 2d) and 4b);
- Annex A: Title changed in "Material groups of cast irons (relating to CEN ISO/TR 15608:2017);
- Annex A: Table A.1 revised;
- Annex C, C.2.2.4: Welding processes "138" and "143" added;
- Bibliography revised.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## **Introduction**

The ability of a welder to follow written instructions and verification of a person's skills are important factors in ensuring the quality of a welded product.

The testing of a welder's skill in accordance with this standard depends on welding techniques and conditions used in which uniform rules are complied with, and standard test pieces are used.

The principle of this European Standard is that a qualification test qualifies the welder not only for the conditions used in the test, but also for all joints which are considered easier to weld on the presumption that the welder has received a specific training and/or has industrial practice within the range of qualification.

The qualification test can be used to qualify a welding procedure and a welder provided that all the relevant requirements, e.g. test piece dimensions, are satisfied.

**EN 287-6:2018 (E)****1 Scope**

This document specifies main requirements, limits, inspection conditions and acceptance requirements as well as related inspection documents of welders for welded cast iron test pieces and workpieces.

It provides a set of technical rules for a systematic qualification test of a welder's skills, and enables such qualifications to be uniformly accepted independently of the type of product, location and examiner or examining body.

This document specifies the testing of a welder's skill unless a higher level skill test is required.

The acceptance of a welder's skill in accordance with this document implies a practical experience and knowledge regarding the welding process, materials and safety requirements (see Annex C).

This document is to be used when requirements on part of a customer, testing or monitoring body or other organization are postulated.

This document defines the qualification test of welders for the fusion welding of cast irons. The welding processes referred to in this standard include those fusion welding processes which are designated as manual or partly mechanized welding. It does not cover fully mechanized and automated welding processes (see EN ISO 14732). Cast iron materials which are covered by this document are mentioned in 5.4.

The inspection document and certification are made out under the responsibility of the testing body.

**2 Normative references**

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
