Communication networks and systems for power utility automation - Part 8-2: Specific Communication Service Mapping (SCSM) - Mapping to Extensible Messaging Presence Protocol (XMPP)

Táto norma obsahuje anglickú verziu európskej normy.  
This standard includes the English version of the European Standard.

Táto norma bola oznámená vo Vestníku ÚNMS SR č. 07/19

Obsahuje: EN IEC 61850-8-2:2019, IEC 61850-8-2:2018

English Version

**Communication networks and systems for power utility  
automation - Part 8-2: Specific Communication Service Mapping  
(SCSM) - Mapping to Extensible Messaging Presence Protocol  
(XMPP)  
(IEC 61850-8-2:2018)**

Réseaux et systèmes de communication pour  
l'automatisation des systèmes électriques - Partie 8-2:  
Mapping des services de communication spécifiques  
(SCSM) - Mapping avec le protocole XMPP (Extensible  
Messaging Presence Protocol)  
(IEC 61850-8-2:2018)

Kommunikationsnetze und -systeme für die  
Automatisierung der elektrischen Energieversorgung - Teil  
8-2: Spezifische Abbildung von Kommunikationsdiensten  
(SCSM) - Abbildungen auf erweiterbares Messaging  
Presence Protocol (XMPP)  
(IEC 61850-8-2:2018)

This European Standard was approved by CENELEC on 2019-01-18. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

**EN IEC 61850-8-2:2019 (E)****European foreword**

The text of document 57/2020/FDIS, future edition 1 of IEC 61850-8-2, prepared by IEC/TC 57 "Power systems management and associated information exchange" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 61850-8-2:2019.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2019-10-18
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2022-01-18

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CENELEC by the European Commission and the European Free Trade Association.

**Endorsement notice**

The text of the International Standard IEC 61850-8-2:2018 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC 61850-7-1	NOTE	Harmonized as EN 61850-7-1
IEC 61850-7-410	NOTE	Harmonized as EN 61850-7-410
IEC 61850-7-420	NOTE	Harmonized as EN 61850-7-420

## Annex ZA

(normative)

### **Normative references to international publications with their corresponding European publications**

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 Where an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: [www.cenelec.eu](http://www.cenelec.eu).

#### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

#### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

##### **IEC Catalogue - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)**

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

##### **IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)**

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

##### **IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)**

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

##### **Electropedia - [www.electropedia.org](http://www.electropedia.org)**

The world's leading online dictionary of electronic and electrical terms containing 21 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

##### **IEC Glossary - [std.iec.ch/glossary](http://std.iec.ch/glossary)**

67 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

##### **IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)**

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

#### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

##### **Catalogue IEC - [webstore.iec.ch/catalogue](http://webstore.iec.ch/catalogue)**

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

##### **Recherche de publications IEC - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)**

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

##### **IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)**

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

##### **Electropedia - [www.electropedia.org](http://www.electropedia.org)**

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 21 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalelement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

##### **Glossaire IEC - [std.iec.ch/glossary](http://std.iec.ch/glossary)**

67 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

##### **Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)**

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [sales@iec.ch](mailto:sales@iec.ch).

## CONTENTS

FOREWORD .....	13
INTRODUCTION .....	15
1 Scope .....	16
1.1 General .....	16
1.2 Namespace name and version .....	16
1.3 Code Component distribution .....	17
2 Normative references .....	17
3 Terms and definitions .....	19
4 Abbreviated terms .....	21
5 Overview .....	22
5.1 General .....	22
5.2 Mapping of client/server services .....	23
5.2.1 General .....	23
5.2.2 XML payloads .....	24
5.2.3 Implementation agreements .....	25
5.2.4 XMPP .....	25
5.3 Time sync services .....	26
6 Usage of XMPP .....	26
6.1 Principles .....	26
6.2 Connection establishment .....	26
6.2.1 General .....	26
6.2.2 Usage of TLS and SASL .....	26
6.2.3 Stream Compression .....	27
6.3 Mapping of ACSI services .....	27
6.4 Usage of XMPP presence .....	28
6.5 Usage of the Roster .....	28
6.6 XMPP extensions .....	28
6.6.1 Usage of XMPP PING – XEP 0199 .....	28
6.6.2 Usage of Stream Management – XEP 0198 .....	28
6.7 Implementation agreements – XMPP PING – XEP 0199 .....	28
7 End-to-end security .....	29
8 Payload description .....	29
8.1 XSD overview .....	29
8.2 Objects of IEC 61850 .....	29
8.2.1 General .....	29
8.2.2 Logical Node (LN) .....	30
8.2.3 Mapping of references of Logical Nodes to VariableAccessSpecifications .....	33
8.2.4 Mapping of DataObjects reference to VariableAccessSpecifications .....	34
8.2.5 Mapping of DataAttributes (DataAttr) reference to VariableAccessSpecifications .....	35
8.2.6 Usage of alternate access for DataObjects and DataAttributes references .....	35
8.3 Mapping of IEC 61850-7-2 data attributes .....	40
8.3.1 BasicTypes .....	40
8.3.2 Additional definitions of BasicType .....	41
8.3.3 Common ACSITypes .....	43

8.3.4	Mapping of quality common data attribute type specified in IEC 61850-7-2 ....	54
8.4	General mapping of data values within XML payloads.....	55
8.5	Extended behaviour for optimization of bandwidth.....	56
9	Server class model .....	56
9.1	General.....	56
9.2	GetServerDirectory .....	57
9.2.1	General .....	57
10	Association model .....	60
10.1	Association relation to communication profiles .....	60
10.2	Two party association model for client/server communication profile .....	61
10.2.1	Establishment of a secured end-to-end association .....	61
10.2.2	Association services .....	61
11	Logical device model .....	66
11.1	General.....	66
11.2	Response- .....	68
11.3	Extended behaviour .....	69
12	Logical Node model .....	70
12.1	General.....	70
12.2	GetLogicalNodeDirectory .....	71
12.2.1	General .....	71
12.2.2	Response- .....	73
12.2.3	Extended behaviour .....	73
12.3	GetDataValues.....	76

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

---

### COMMUNICATION NETWORKS AND SYSTEMS FOR POWER UTILITY AUTOMATION –

#### **Part 8-2: Specific Communication Service Mapping (SCSM) – Mapping to Extensible Messaging Presence Protocol (XMPP)**

#### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61850-8-2 has been prepared by IEC technical committee 57: Power systems management and associated information exchange.

The text of this standard is based on the following documents:

FDIS	Report on voting
57/2020/FDIS	57/2039/RVD

Full information on the voting for the approval of this International Standard can be found in the report on voting indicated in the above table.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

This IEC standard includes Code Components i.e components that are intended to be directly processed by a computer. Such content is any text found between the markers <CODE BEGINS> and <CODE ENDS>, or otherwise is clearly labeled in this standard as a Code Component.

The purchase of this IEC standard carries a copyright license for the purchaser to sell software containing Code Components from this standard to end users either directly or via distributors, subject to IEC software licensing conditions, which can be found at: [www.iec.ch/CCv1](http://www.iec.ch/CCv1).

A list of all parts in the IEC 61850 series, published under the general title *Communication networks and systems for power utility automation*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under "<http://webstore.iec.ch>" in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

This part of IEC 61850 is part of a set of specifications which details layered utility communication architecture.

The usage of the IEC 61850 communication standard is largely spreading over all the domains connected to the smart grid, pushing the usage of technologies adapted to the connection of a very large number of applications and devices across the intra/inter-net. The involved domains use already well established protocols typically for exchanging data with IT level applications like resource planning, asset and maintenance management, etc. Therefore, it becomes imperative to provide an integration strategy that allows the integration of IEC 61850 into these various disparate protocols and information.

In this context, this part of IEC 61850 describes a specific communication service mapping (SCSM) over the Extensible Messaging and Presence Protocol (XMPP), providing detailed information on how to create and exchange concrete communication messages that implement abstract services and models specified in IEC 61850-7-4, IEC 61850-7-3, and IEC 61850-7-2.

This mapping is intended to be utilized between all kinds of utility Distributed Energy Resource devices and their related management systems, in particular over public networks.

**NOTE** This part of IEC 61850 does not provide tutorial material. For this purpose, IEC 61850-5 and IEC 61850-7-1 can be read in conjunction with IEC 61850-7-2.

## COMMUNICATION NETWORKS AND SYSTEMS FOR POWER UTILITY AUTOMATION –

### **Part 8-2: Specific Communication Service Mapping (SCSM) – Mapping to Extensible Messaging Presence Protocol (XMPP)**

## **1 Scope**

### **1.1 General**

This part of IEC 61850 specifies a method of exchanging data through any kinds of network, including public networks. Among the various kinds of services specified in IEC 61850-7-2, only the client/server and time synchronization services are considered so far.

NOTE Client/server services of GOOSE and SMV models are mapped as well (see Table 1).

For the client/server services, the principle is to map the objects and services of the ACSI (Abstract Communication Service Interface defined in IEC 61850-7-2) to XML messages transported over XMPP. The mapping description includes mainly three aspects:

- The usage of the XMPP protocol itself, describing in details which features are really used and how they are used by the mapping (see Clause 6).
- How to achieve end-to-end secured communications (see Clause 7).
- The description of the XML payloads corresponding to each ACSI service thanks in particular to the XML Schema and XML message examples (starting at Clause 9).

NOTE 1 This document does not address the detailed usage of the XMPP protocol.

NOTE 2 This document does not address system management services.

NOTE 3 For the information of people familiar with the mapping defined in IEC 61850-8-1, the XML messages defined in the present document are derived from those defined in IEC 61850-8-1 but with an XML encoding instead of a binary one. In this way implementing gateways between IEC 61850-8-1 and IEC 61850-8-2 is very straightforward in both directions. However reading IEC 61850-8-1 is not necessary to understand the present document except when it is used in conjunction with one of the GOOSE mappings described in IEC 61850-8-1.

### **1.2 Namespace name and version**

This new section is mandatory for any IEC 61850 namespace (as defined by IEC 61850-7-1).

The parameters which identify this release of the SCSM\_8\_2 namespace `xmlns="http://www.iec.ch/61850/2018/SCSM_8_2"` are:

- Namespace Version: 2018
- Namespace Revision: A
- Namespace Release: 1
- Namespace release date: 2018-12

Edition	Publication date	Webstore	Namespace
Edition 1.0	2018-12	IEC 61850-8-2:2018	IEC 61850-8-2:2018

### 1.3 Code Component distribution

The Code Components included in this IEC standard are also available as electronic machine readable file at:

[http://www.iec.ch/tc57/supportdocuments/IEC\\_61850-8-2.2018\\_ed1.0.XSD.2018A1.full.zip](http://www.iec.ch/tc57/supportdocuments/IEC_61850-8-2.2018_ed1.0.XSD.2018A1.full.zip)

The Code Component(s) included in this IEC standard are potentially subject to maintenance works and users shall select the latest release in the repository located at: <https://www.iec.ch/tc57/supportdocuments>.

The latest version/release of the document will be found by selecting the file IEC 61850-8-2.2018\_ed1.0.XSD.{VersionStateInfo}.full.zip with the filed VersionStateInfo of the highest value.

In case of any differences between the downloadable code mentioned above and the IEC pdf published content, the downloadable code(s) is(are) the valid one; it may be subject to updates. See history files.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 61850 (all parts), *Communication networks and systems for power utility automation*

IEC TS 61850-2, *Communication networks and systems in substations – Part 2: Glossary*

IEC 61850-5, *Communication networks and systems for power utility automation – Part 5: Communication requirements for functions and device models*

IEC 61850-6, *Communication networks and systems for power utility automation – Part 6: Configuration description language for communication in electrical substations related to IEDs*

IEC 61850-7-1, *Communication networks and systems for power utility automation – Part 7-1: Basic communication structure – Principles and models*

IEC 61850-7-2:2010, *Communication networks and systems for power utility automation – Part 7-2: Basic information and communication structure – Abstract communication service interface (ACSI)*

IEC 61850-7-2:2010/AMD1:2018

IEC 61850-7-3, *Communication networks and systems for power utility automation – Part 7-3: Basic communication structure – Common data classes*

IEC 61850-7-4, *Communication networks and systems for power utility automation – Part 7-4: Basic communication structure – Compatible logical node classes and data object classes*

IEC 61850-8-1:2011, *Communication networks and systems for power utility automation – Part 8-1: Specific communication service mapping (SCSM) – Mappings to MMS (ISO 9506-1 and ISO 9506-2) and to ISO/IEC 8802-3*

IEC 61850-8-1:2011/AMD1:2018

IEC 62351 (all parts), *Power systems management and associated information exchange – Data and communications security*

IEC 62351-4:2018, *Power systems management and associated information exchange – Data and communications security – Part 4: Profiles including MMS and derivatives*<sup>1</sup>

IEC 62351-6, *Power systems management and associated information exchange – Data and communications security – Part 6: Security for IEC 61850*<sup>2</sup>

IEC TR 62357-200, *Power systems management and associated information exchange – Part 200: Guidelines for migration from Internet Protocol version 4 (IPv4) to Internet Protocol version 6 (IPv6)*

ISO/IEC 7498-1:1994, *Information technology – Open systems interconnection – Basic reference model: The basic model*

ISO/IEC 8824-1:2015 [ITU-T X.680:2015], *Information technology – Abstract Syntax Notation One (ASN.1): Specification of basic notation*

ISO/IEC 8825-4:2015 [ITU-T X.693:2015], *Information technology – ASN.1 encoding rules: XML Encoding Rules (XER)*

ISO 9506 (all parts), *Industrial automation systems – Manufacturing message specification*

ISO 9506-1:2003, *Industrial automation systems – Manufacturing message specification – Part 1: Service definition*

ISO 9506-2:2003, *Industrial automation systems – Manufacturing message specification – Part 2: Protocol specification*

IEEE C37.111:1999, *IEEE standard common format for transient data exchange (COMTRADE) for power systems*

IEEE 754:1985, *IEEE Standard for binary floating-point arithmetic*

RFC 768, *User datagram protocol*, IETF, available at <http://www.ietf.org>

RFC 791, *Internet protocol – DARPA Internet Program – Protocol specification*, IETF, available at <http://www.ietf.org>

RFC 792, *Internet control message protocol – DARPA internet program – Protocol specification*, IETF, available at <http://www.ietf.org>

RFC 793, *Transmission control protocol – DARPA internet program – Protocol specification*, IETF, available at <http://www.ietf.org>

RFC 826, *An Ethernet address resolution protocol or converting network protocol addresses to 48-bit Ethernet address for transmission on Ethernet hardware*, IETF, available at <http://www.ietf.org>

RFC 919, *Broadcasting internet datagrams*, IETF, available at <http://www.ietf.org>

<sup>1</sup> Under preparation. Stage at the time of publication: IEC/DECFDIS 62351-4:2018.

<sup>2</sup> At the time of publication, a new edition was under preparation.

RFC 922, *Broadcasting internet datagrams in the presence of subnets*, IETF, available at <http://www.ietf.org>

RFC 950, *Internet standard subnetting procedure*, IETF, available at <http://www.ietf.org>

RFC 1112, *Host extensions for IP multicasting*, IETF, available at <http://www.ietf.org>

RFC 2460, *Internet protocol, Version 6 (IPv6) specification*, IETF, available at <http://www.ietf.org>

RFC 3629, *UTF-8, a transformation format of ISO 1646 – IETF*, available at <http://www.ietf.org>

RFC 4422, *Simple authentication and security layer (SASL)*, available at <http://www.ietf.org>

RFC 5246:2008, *The TLS protocol version 1.2*, available at <http://www.ietf.org>

RFC 5905, *Network time protocol (NTP) Version 4: Protocol and algorithms specification*, IETF, available at <http://www.ietf.org>

RFC 6120, *Extensible messaging and presence protocol (XMPP): Core*, available at <http://www.ietf.org>

RFC 6121, *Extensible messaging and presence protocol (XMPP): Instant messaging and presence*, available at <http://www.ietf.org>

RFC 6122, *Extensible messaging and presence protocol (XMPP): Address format*, available at <http://www.ietf.org>

XEP-0198, *Stream management*

NOTE This specification defines an XMPP protocol extension for active management of an XML stream between two XMPP entities, including features for stanza acknowledgements and stream resumption.

XEP-0199, *XMPP Ping*

NOTE This specification defines an XMPP protocol extension for sending application-level pings over XML streams. Such pings can be sent from a client to a server, from one server to another, or end-to-end.
