This document (EN 13523-11:2019) has been prepared by Technical Committee CEN/TC 139 “Paints and varnishes”, the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by March 2020, and conflicting national standards shall be withdrawn at the latest by March 2020.

This document supersedes EN 13523-11:2011.

The main changes compared to EN 13523-11:2011 are:

- a) the absorbent material is described in more detail: e.g. synthetic material shall not be used;
- b) other solvents such as acetone and methyl isobutyl ketone are also allowed;
- c) the description of the test panel is given in more details;
- d) it is stated that the solvent used shall be also at room temperature before use;
- e) it is amended that visual inspection of the rubbed area shall be carried out during the test and immediately after the rubbing operation;
- f) “strokes” are changed to “rubs”;
- g) a figure of the test apparatus is added;
- h) items c), f) and i) have been added to the test report (Clause 13);
- i) the text has been editorially revised and the normative references have been updated.
