English version

**Space product assurance - Components reliability data
sources and their use**

Assurance produit des projets spatiaux - Sources de
données de fiabilité composants et leur utilisation

Raumfahrtproduktsicherung - Datenquellen zur
Bauteilezuverlässigkeit und ihre Anwendung

This Technical Report was approved by CEN on 22 November 2021. It has been drawn up by the Technical Committee CEN/CLC/JTC 5.

CEN and CENELEC members are the national standards bodies and national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Rue de la Science 23, B-1040 Brussels**

Table of contents

European Foreword	4
1 Scope	5
2 References	6
3 Terms, definitions and abbreviated terms	7
3.1 Terms from other documents.....	7
3.2 Abbreviated terms.....	7
4 Selection of reliability data and methods	8
4.1 Introduction.....	8
4.2 Selection process	8
4.3 Description of data.....	11
4.3.1 Handbook reliability data	11
4.3.2 Manufacturer or user data	11
4.4 Selection criteria for input sources	11
4.4.1 Reliability handbooks	11
4.4.2 Manufacturer or user data	12
4.5 Justification for choice	14
4.6 Instructions for use	15
4.6.1 Reliability handbooks	15
4.6.2 Manufacturer or user data	15
4.7 Considerations for reliability prediction for mechanical parts.....	16
4.7.1 General	16
4.7.2 Part failure data analysis	17
4.7.3 Empirical reliability relationships.....	17
4.7.4 Analysis of the stress-strength	17
4.7.5 Handbook data.....	18
4.8 Documentation	18
Annex A Potential data sources	19
A.1 Introduction.....	19
A.2 EEE parts	19

European Foreword

This document (CEN/TR 17602-30-08:2021) has been prepared by Technical Committee CEN/CLC/JTC 5 "Space", the secretariat of which is held by DIN.

It is highlighted that this technical report does not contain any requirement but only collection of data or descriptions and guidelines about how to organize and perform the work in support of EN 16602-30.

This Technical report (CEN/TR 17602-30-08:2021) originates from ECSS-Q-HB-30-08A.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

This document has been developed to cover specifically space systems and has therefore precedence over any TR covering the same scope but with a wider domain of applicability (e.g.: aerospace).

1

Scope

This handbook identifies data sources and respective methods that can be used for reliability prediction of components. It proposes suitable data sources and an application matrix for component families.
