Bitumen and bituminous binders - Determination of settling tendency of bituminous emulsions

Táto norma obsahuje anglickú verziu európskej normy. This standard includes the English version of the European Standard.

Táto norma bola oznámená vo Vestníku ÚNMS SR č. 09/22

Obsahuje: EN 12847:2022

Oznámením tejto normy sa ruší STN EN 12847 (65 7067) z augusta 2009

NORME EUROPÉENNE

EUROPÄISCHE NORM

July 2022

ICS 75.140; 91.100.50

Supersedes EN 12847:2009

English Version

Bitumen and bituminous binders - Determination of settling tendency of bituminous emulsions

Bitumes et liants bitumineux - Détermination de la tendance à la décantation des émulsions bitumineuses

Bitumen und bitumenhaltige Bindemittel -Bestimmung des Absetzverhaltens von Bitumenemulsionen

This European Standard was approved by CEN on 13 June 2022.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

EN 12847:2022 (E)

European foreword

This document (EN 12847:2022) has been prepared by Technical Committee CEN/TC 336 "Bituminous binders", the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2023, and conflicting national standards shall be withdrawn at the latest by January 2023.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 12847:2009.

The main technical change is the possibility of using drying balance (EN 16849) for determination of water content in bituminous emulsions under certain conditions (for emulsions containing less than 1.5% of a volatile flux) and with precautions to be taken (test temperature). The test method used for the determination of water content (EN 1428 or EN 1431 or EN 16849) is mentioned in the test report.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

EN 12847:2022 (E)

1 Scope

This document specifies a method for the determination of the settling tendency of bituminous emulsions.

WARNING — The use of this document can involve hazardous materials, operations and equipment. This document does not purport to address all of the safety problems associated with its use. It is the responsibility of the user of this document to establish appropriate safety and health practices and to determine the applicability of regulatory limitations prior to use.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 58, Bitumen and bituminous binders - Sampling bituminous binders

EN 1428, Bitumen and bituminous binders - Determination of water content in bituminous emulsions - Azeotropic distillation method

EN 1431, Bitumen and bituminous binders - Determination of residual binder and oil distillate from bitumen emulsions by distillation

EN 12594, Bitumen and bituminous binders - Preparation of test samples

EN 16849, Bitumen and bituminous binders - Determination of water content in bituminous emulsions - Method using a drying balance
