

<b>STN</b>	<b>Špecifikácia rozhrania softvérových nástrojov na prácu s prevádzkovými prístrojmi (FDT) Časť 2: Koncept a podrobný opis</b>	<b>STN EN IEC 62453-2</b>  18 4012
------------	--	--

Field device tool (FDT) interface specification - Part 2: Concepts and detailed description

Táto norma obsahuje anglickú verziu európskej normy.  
This standard includes the English version of the European Standard.

Táto norma bola oznámená vo Vestníku ÚNMS SR č. 12/22

Obsahuje: EN IEC 62453-2:2022, IEC 62453-2:2022

Oznámením tejto normy sa od 05.10.2025 ruší  
STN EN 62453-2 (18 4012) z augusta 2017

**Field device tool (FDT) interface specification - Part 2: Concepts  
and detailed description  
(IEC 62453-2:2022)**

Spécification des interfaces des outils des dispositifs de terrain (FDT) - Partie 2: Concepts et description détaillée (IEC 62453-2:2022)

Field Device Tool (FDT)-Schnittstellenspezifikation - Teil 2: Konzept und grundlegende Beschreibung (IEC 62453-2:2022)

This European Standard was approved by CENELEC on 2022-10-05. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

**EN IEC 62453-2:2022 (E)****European foreword**

The text of document 65E/906/FDIS, future edition 3 of IEC 62453-2, prepared by SC 65E "Devices and integration in enterprise systems" of IEC/TC 65 "Industrial-process measurement, control and automation" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN IEC 62453-2:2022.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2023-07-05
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2025-10-05

This document supersedes EN 62453-2:2017 and all of its amendments and corrigenda (if any).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users' national committee. A complete listing of these bodies can be found on the CENELEC website.

**Endorsement notice**

The text of the International Standard IEC 62453-2:2022 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

IEC/TR 62453-41 NOTE Harmonized as CLC/TR IEC 62453-41

IEC/TR 62453-42 NOTE Harmonized as CLC/TR IEC 62453-42

## Annex ZA (normative)

### Normative references to international publications with their corresponding European publications

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE 1 Where an International Publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

NOTE 2 Up-to-date information on the latest versions of the European Standards listed in this annex is available here: [www.cenelec.eu](http://www.cenelec.eu).

#### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

#### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

---

#### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

#### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Recherche de publications IEC - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

1 Scope .....	13
2 Normative references .....	13
3 Terms, definitions, symbols, abbreviated terms and conventions .....	13
3.1 Terms and definitions .....	13
3.2 Symbols and abbreviated terms .....	14
3.3 Conventions .....	14
3.3.1 Use of UML .....	14
3.3.2 State availability statement .....	14
3.3.3 Data type names and references to data types .....	14
4 Fundamentals .....	14
4.1 General .....	14
4.2 Abstract FDT model .....	15
4.2.1 FDT model overview .....	15
4.2.2 Frame Application (FA) .....	18
4.2.3 Device Type Manager (DTM) .....	19
4.2.4 Channel object .....	26
4.3 Modularity .....	28
4.4 Bus categories .....	28
4.5 Identification .....	29
4.5.1 DTM instance identification .....	29
4.6 System and FDT topology .....	30
4.7 FDT Communication .....	31
4.7.1 General .....	31
4.7.2 Handling of communication requests .....	32
4.7.3 Handling of communication errors .....	32
4.7.4 Handling of loss of connection .....	32
4.7.5 Point-to-point communication .....	32
4.7.6 Nested communication .....	33
4.8 DTM, DTM Device Type and hardware identification information .....	35
4.8.1 DTM and DTM Device Type .....	35
4.8.2 Supported hardware identification .....	36
4.8.3 Connected hardware identification .....	36
4.9 DTM data persistence and synchronization .....	37
4.10 DTM device parameter access .....	38
4.11 DTM state machine .....	38
4.11.1 DTM states .....	38
4.11.2 'Communication allowed' substates .....	39
4.12 Basic operation phases .....	40
4.12.1 Roles and access rights .....	40
4.12.2 Operation phases .....	40
4.13 FDT version interoperability .....	41
4.13.1 Version interoperability overview .....	41
4.13.2 DTM and device versions .....	42
4.13.3 Persistence .....	42

4.13.4	Nested communication .....	43
5	FDT session model and use cases .....	43
5.1	Session model overview.....	43
5.2	Actors .....	44
5.3	Use cases .....	46

5.3.4	Maintenance .....	50
5.3.5	Planning .....	53
5.3.6	OEM service.....	56
5.3.7	Administration.....	56
6	General concepts .....	57
6.1	Address management .....	57
6.2	Scanning and DTM assignment.....	58
6.2.1	Scanning overview.....	58
6.2.2	Scanning .....	58
6.2.3	DTM assignment.....	59
6.2.4	Manufacturer-specific device identification.....	59
6.2.5	Scan for communication hardware .....	60
6.3	Configuration of Fieldbus Master or Communication Scheduler.....	60
6.4	PLC tool support.....	61
6.4.1	General .....	61
6.4.2	Process image modifications while PLC is running.....	62
6.5	Slave redundancy .....	63
6.5.1	Redundancy overview.....	63
6.5.2	Redundancy support in Frame Application .....	64
6.5.3	Parent component for redundant fieldbus.....	64
6.5.4	Redundancy support in Device DTM .....	65
6.5.5	Scan and redundant slaves.....	65
7	FDT service specification.....	65
7.1	Service specification overview .....	65
7.2	DTM services.....	66
7.2.1	General services.....	66
7.2.2	DTM services related to installation .....	68
7.2.3	DTM services related to DTM/device information .....	69
7.2.4	DTM services related to the DTM state machine .....	71
7.2.5	DTM services related to functions .....	74
7.2.6	DTM services related to Channel objects – service GetChannels.....	77
7.2.7	DTM services related to documentation – service GetDocumentation .....	77
7.2.8	DTM services to access the instance data .....	77
7.2.9	DTM services to evaluate the instance data.....	79
7.2.10	DTM services to access the device data .....	80
7.2.11	DTM services related to network management information .....	81
7.2.12	DTM services related to online operation .....	82
7.2.13	DTM services related to data synchronization .....	84
7.2.14	DTM services related to import and export.....	86
7.3	Presentation object services .....	86
7.4	Channel object service.....	87

7.4.1	Channel object service overview .....	87
7.4.2	Service ReadChannelInformation .....	87
7.4.3	Service WriteChannelInformation .....	87
7.5	Process Channel object services – services for I/O related information .....	87
7.5.1	Service ReadChannelData .....	87
7.5.2	Service WriteChannelData .....	88
7.6	Communication Channel object services .....	88
7.6.1	Services related to communication .....	88
7.6.2	Services related to sub-topology management .....	92
7.6.3	Services related to GUI and functions .....	94
7.6.4	Service Scan .....	95
7.7	Frame Application services .....	96
7.7.1	General state availability .....	96
7.7.2	FA services related to general events .....	96
7.7.3	FA services related to topology management .....	97
7.7.4	FA services related to redundancy .....	100
7.7.5	FA services related to storage of DTM data .....	101
7.7.6	FA services related to DTM data synchronization .....	102
7.7.7	FA service related to process image validation – service ValidateProcessImage .....	103
7.7.8	FA services related to presentation .....	104
7.7.9	FA Services related to audit trail – service RecordAuditTrailEvent .....	105
8	FDT dynamic behavior .....	105
8.1	Generate FDT topology .....	105
8.1.1	FDT topology generation triggered by the Frame Application .....	105
8.1.2	FDT topology generation triggered by the DTM .....	106
8.2	Address setting .....	107
8.2.1	Address setting overview .....	107
8.2.2	Set or modify device address – with user interface .....	107
8.2.3	Set or modify device address – without user interface .....	107
8.2.4	Display or modify all child device addresses with user interface .....	108
8.3	Communication .....	109
8.3.1	Communication overview .....	109
8.3.2	Point-to-point communication .....	109
8.3.3	Nested communication .....	109
8.3.4	Device-initiated data transfer .....	110
8.4	Scanning and DTM assignment .....	111
8.5	Multi-user scenarios .....	112
8.5.1	General .....	112
8.5.2	Synchronized and non-synchronized locking mechanism for DTMs .....	114
8.5.3	Additional rules .....	116
8.6	Notification of changes .....	116
8.7	DTM instance data state machines .....	116
8.7.1	Instance data set overview .....	116
8.7.2	Modifications state machine .....	117
8.7.3	Persistence state machine .....	118
8.7.4	Modification in device .....	118
8.7.5	Storage life cycle .....	119
8.8	Parent component handling redundant slave .....	120

8.9	DTM upgrade .....	121
8.9.1	General rules .....	121
8.9.2	Saving data from a DTM to be upgraded .....	122
8.9.3	Loading data in the replacement DTM .....	122

# INTERNATIONAL ELECTROTECHNICAL COMMISSION

## FIELD DEVICE TOOL (FDT) INTERFACE SPECIFICATION –

### Part 2: Concepts and detailed description

#### FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62453-2 has been prepared by subcommittee 65E: Devices and integration in enterprise systems, of IEC technical committee 65: Industrial-process measurement, control and automation. It is an International Standard.

This third edition cancels and replaces the second edition published in 2016. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) clarification for Static Function,
- b) clarification regarding system GUI label,
- c) clarification regarding loss of connection.

The text of this International Standard is based on the following documents:

Draft	Report on voting
65E/906/FDIS	65E/933/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/standardsdev/publications](http://www.iec.ch/standardsdev/publications).

A list of all parts of the IEC 62453 series, under the general title *Field device tool (FDT) interface specification*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**

## INTRODUCTION

This part of IEC 62453 is an interface specification for developers of FDT<sup>1</sup> (Field Device Tool) components for function control and data access within a client/server architecture. The specification is a result of an analysis and design process to develop standard interfaces to facilitate the development of servers and clients by multiple vendors that need to interoperate seamlessly.

With the integration of fieldbuses into control systems, there are a few other tasks which need to be performed. In addition to fieldbus- and device-specific tools, there is a need to integrate these tools into higher-level system-wide planning or engineering tools. In particular, for use in extensive and heterogeneous control systems, typically in the area of the process industry, the unambiguous definition of engineering interfaces that are easy to use for all those involved is of great importance.

A device-specific software component created according to this document is called Device Type Manager (DTM). It integrates all device-specific data, functions and business rules into the system via the FDT services defined herein.

The FDT/DTM approach is open for all kind of fieldbuses and enables integration variety of devices into heterogeneous systems.

Figure 1 shows how this document is aligned in the structure of the IEC 62453 series.

## FIELD DEVICE TOOL (FDT) INTERFACE SPECIFICATION –

### Part 2: Concepts and detailed description

#### 1 Scope

This part of IEC 62453 explains the common principles of the field device tool concept. These principles can be used in various industrial applications such as engineering systems, configuration programs and monitoring and diagnostic applications.

This document specifies the general objects, general object behavior and general object interactions that provide the base of FDT.

#### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
