Rubber- or plastic-coated fabrics - Upholstery fabrics - Classification and methods of test

Táto norma obsahuje anglickú verziu európskej normy.  
This standard includes the English version of the European Standard.

Táto norma bola oznámená vo Vestníku ÚNMS SR č. 03/23

Obsahuje: EN 15618:2022

Oznámením tejto normy sa ruší  
STN EN 15618+A1 (80 0924) z októbra 2012

This European Standard was approved by CEN on 21 November 2022.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

## European foreword

This document (EN 15618:2022) has been prepared by Technical Committee CEN/TC 248 “Textiles and textile products”, the secretariat of which is held by BSI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2023, and conflicting national standards shall be withdrawn at the latest by June 2023.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 15618:2009+A1:2012.

The main changes compared to the previous edition are as follows:

- in the Introduction, the term “categories” has been changed to “requirement levels”;
- in Clause 2, the reference to ISO 5981 and prEN ISO 26081 have been deleted. Some references have been replaced (ISO 3303 by EN ISO 3303-2, EN ISO 5402 by EN ISO 32100 and EN ISO 26082 by EN ISO 26082-1). New references have been added (EN ISO 105-C06, EN ISO 105-E16, EN ISO 5077 and ISO 105-F09);
- in Clause 4, the former Table 1 has been split into separate Tables including a change to a new requirement level format to avoid misunderstanding of product categories. Supplementary properties have been added (colour fastness to water spotting, to domestic and commercial laundering, determination of dimensional change in washing and drying) with their related normative references. The requirements of resistance to soil detailed according to EN ISO 26082-1 are mandatory (the former Table 2 of optional properties has been deleted).

Any feedback and questions on this document should be directed to the users’ national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

**EN 15618:2022 (E)****Introduction**

This document introduces a system of performance levels. It is not possible to divide upholstery fabrics into just a few performance categories, because of the enormous variety of conditions of use. In addition, the type of upholstery (firm or soft) influences the abrasion of the upholstery fabric and hence the requirements to the abrasion resistance. There is, for example, a tremendous difference between furniture used in a room without windows and furniture which is directly exposed to sunlight, or between furniture used by elder people and furniture used by a family with small children. These differences in conditions and severity of use necessitate a flexible approach. This is done by defining a performance level for each property. This allows to choose the appropriate level for each parameter and so to compose a “product profile”, adapted to each specific type of use. This means that high resistance to abrasion can be combined with, for example, low colour fastness. However, due to the interrelation of some parameters, not all combinations will be possible.

## 1 Scope

This document specifies a set of properties relevant to the assessment of coated upholstery fabrics for indoor furniture and the appropriate test methods to determine these properties. It also describes a matrix system to express the material properties of an upholstery fabric.

This document is applicable to upholstery fabrics both in domestic and public use, except when used for the seats of road or railway vehicles, boats or aeroplanes.

This document applies to upholstery fabrics with a coating on the wear face.

This document does not apply to textile upholstery fabrics covered by EN 14465.

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 1021-1, *Furniture — Assessment of the ignitability of upholstered furniture — Part 1: Ignition source smouldering cigarette*

EN 1021-2, *Furniture — Assessment of the ignitability of upholstered furniture — Part 2: Ignition source match flame equivalent*

EN 15973:2011, *Rubber- or plastic-coated fabrics — Upholstery fabrics — Resistance to soiling*
