English Version

Electric vehicles conductive charging system - Part 3-1: DC EV
supply equipment where protection relies on double or reinforced
insulation - General rules and requirements for stationary
equipment
(IEC/TS 61851-3-1:2023)

Système de charge conductive pour véhicules électriques -
Partie 3-1 : Exigences générales relatives aux systèmes de
charge conductive en courant alternatif et continu des
véhicules électriques légers
(IEC/TS 61851-3-1:2023)

Konduktive Ladesysteme für Elektrofahrzeuge - Teil 3-1:
Gleichstrom-Versorgungseinrichtungen für
Elektrofahrzeuge mit Schutzwirkung durch doppelte oder
verstärkte Isolierung - Allgemeine Regeln und
Anforderungen für ortsfeste Betriebsmittel
(IEC/TS 61851-3-1:2023)

This Technical Specification was approved by CENELEC on 2023-12-04.

CENELEC members are required to announce the existence of this TS in the same way as for an EN and to make the TS available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

European foreword

This document (CLC IEC/TS 61851-3-1:2023) consists of the text of IEC/TS 61851-3-1:2023, prepared by IEC/TC 69 "Electrical power/energy transfer systems for electrically propelled road vehicles and industrial trucks".

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a standardization request addressed to CENELEC by the European Commission. The Standing Committee of the EFTA States subsequently approves these requests for its Member States.

Any feedback and questions on this document should be directed to the users' national committee. A complete listing of these bodies can be found on the CENELEC website.

Endorsement notice

The text of the International Technical Specification IEC/TS 61851-3-1:2023 was approved by CENELEC as a European Technical Specification without any modification.

In the official version, for Bibliography, the following notes have to be added for the standard indicated:

About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	8
2 Normative references	9
3 Terms and definitions	11
3.1 Electric supply equipment	12
3.2 Insulation	13
3.3 Functions	14
3.4 Vehicle	15
3.5 Cords, cables and connection means	16
4 Symbols and abbreviated terms.....	18
5 General requirements	18
6 Classification.....	19
6.1 Characteristics of supply network.....	19
6.2 Method of connection.....	19
6.3 Normal environmental conditions	20
6.4 Special environmental conditions	20
6.5 Access.....	20
6.6 Mounting method	20
6.7 EV supply system configuration	20
7 General EV supply system requirements	22
7.1 EV supply system requirements	22
7.1.1 General	22
7.1.2 EV supply system configuration type A	23
7.1.3 EV supply system configuration type B	23
7.1.4 EV supply system configuration type C	23
7.1.5 EV supply system configuration type D	23
7.1.6 EV supply system configuration type E	23
7.1.7 EV supply system configuration type F	23
7.1.8 Conversion device	24
7.2 Voltages and currents	24
7.2.1 Rated voltages and currents	24
7.2.2 Current and voltage regulation.....	24
7.2.3 AUX supply circuit	25
7.3 Functions provided.....	26
7.3.1 Mandatory functions for power transfer	26
7.3.2 Optional functions for power transfer	26
7.3.3 Objects for compatibility check	26
7.4 Requirements for AC/DC or DC/DC VCU for stationery DRI EV supply equipment.....	27
7.4.1 General	27
7.4.2 Built-in AC/DC VCU for stationery DRI EV supply equipment	27
7.4.3 Built-in DC/DC VCU for stationery DRI EV supply equipment	27
7.4.4 Protection against access to live parts of built-in VCUs	27
8 Communications	28
8.1 Command and control communication (mandatory)	28

8.2	Optional communication.....	28
8.3	Communication circuit from the DRI EV supply equipment to the telecommunication networks	28
9	Protection against electric shock	28
9.1	Protection against direct contact	28
9.1.1	General	28
9.1.2	IP ratings for protection against electric shock	29
9.2	Stored energy – Discharge of capacitors.....	29
9.2.1	Disconnection of plug connected EV supply equipment.....	29
9.2.2	Loss of supply voltage to permanently connected EV supply equipment	29
9.3	Fault protection.....	30
9.4	DC leakage currents	30
9.5	Y capacitors.....	30
10	Specific requirements for accessories.....	30
10.1	General requirements	30
10.2	Adaptors	30
10.3	Latching device.....	30
10.4	Contact sequencing of accessories	31
11	Cable assembly requirements.....	31
11.1	General.....	31
11.2	Electrical rating.....	31
11.3	Mechanical characteristics	31
11.4	Storage means for case C.....	32
11.5	Strain relief	32
12	DRI EV supply equipment constructional requirements and tests	32
12.1	Characteristics of mechanical switching devices	32
12.1.1	General	32
12.1.2	Switch and switch-disconnector	32
12.1.3	Contactors.....	32
12.1.4	Circuit-breaker.....	32
12.1.5	Relays	33
12.1.6	Switch-on peak current	33
12.2	Clearances and creepage distances.....	33
12.3	IP degrees	34
12.3.1	Degrees of protection against solid foreign objects and water for the enclosure.....	34
12.3.2	Degrees of protection against solid foreign objects and water for accessories	34
12.4	Insulation resistance	34
12.5	Touch current	35
12.6	Dielectric withstand voltage	35
12.6.1	AC withstand voltage	35
12.6.2	Impulse dielectric withstand (1,2/50 μ s).....	36
12.7	Temperature rise	36
12.8	Damp heat functional test	36
12.9	Minimum temperature functional test.....	36
12.10	Mechanical strength.....	37
13	Overload and short-circuit protection	37
14	Emergency switching or disconnect (optional)	37

15	Marking and instructions.....	38
15.1	Installation manual.....	38
15.2	User manual (instructions) for DRI EV supply equipment	38
15.3	Marking of DRI EV supply equipment type A to type F	39
15.4	Marking of cable assemblies type C and type E	39
15.5	Durability test for marking	39
Annex A	(informative) Acoustical and optical signalling.....	41
A.1	General.....	41
A.2	Optical signalling	41
A.3	Acoustical signalling	41
Annex B	(informative) Example of position for socket outlets	42
Annex C	(informative) Conversion device.....	44
C.1	General.....	44
C.2	Consideration on how to connect a manufacturer specific EV/RESS to a DRI EV supply equipment	44
Annex D	(informative) Examples of VCU wirings	45
D.1	Built-in AC/DC VCU for stationary DRI EV supply equipment	45
D.2	Built-in DC/DC VCU for stationary DRI EV supply equipment	46

INTERNATIONAL ELECTROTECHNICAL COMMISSION

ELECTRIC VEHICLE CONDUCTIVE CHARGING SYSTEM –**Part 3-1: DC EV supply equipment where protection relies
on double or reinforced insulation – General rules
and requirements for stationary equipment**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC TS 61851-3-1 has been prepared by IEC technical committee 69: Electrical power/energy transfer systems for electrically propelled road vehicles and industrial trucks. It is a Technical Specification.

The text of this Technical Specification is based on the following documents:

Draft	Report on voting
69/845/DTS	69/882/RVDTS

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Specification is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

In this document, the following print types are used:

- requirements: in roman type;
- *test specifications: in italic type*;
- notes: in small roman type.

A list of all parts in the IEC 61851 all parts, published under the general title *Electric vehicles conductive charging system*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

INTRODUCTION

This document is published in separate parts according to the following structure:

IEC TS 61851-3-1, *Electric vehicle conductive charging system – Part 3-1: DC EV supply equipment where protection relies on double or reinforced insulation – General rules and requirements for stationary equipment*

IEC TS 61851-3-2, *Electric vehicle conductive charging system – Part 3-2: DC EV supply equipment where protection relies on double or reinforced insulation – Particular requirements for portable and mobile equipment*

IEC TS 61851-3-4, *Electric vehicle conductive charging system – Part 3-4: DC EV supply equipment where protection relies on double or reinforced insulation – General definitions and requirements for CANopen communication*

IEC TS 61851-3-5, *Electric vehicle conductive charging system – Part 3-5: DC EV supply equipment where protection relies on double or reinforced insulation – Pre-defined communication parameters and general application objects*

IEC TS 61851-3-6, *Electric vehicle conductive charging system – Part 3-6: DC EV supply equipment where protection relies on double or reinforced insulation – Voltage converter unit communication*

IEC TS 61851-3-7, *Electric vehicle conductive charging system – Part 3-7: DC EV supply equipment where protection relies on double or reinforced insulation – Battery system communication*

ELECTRIC VEHICLE CONDUCTIVE CHARGING SYSTEM –

Part 3-1: DC EV supply equipment where protection relies on double or reinforced insulation – General rules and requirements for stationary equipment

1 Scope

This part of IEC 61851, which is a Technical Specification, applies to the equipment, including stationary equipment

- for the conductive transfer of electric power between the supply network and
 - an electric road vehicle, or
 - a removable rechargeable energy storage system (RESS), or
 - an on-board RESS of an electric road vehicle,
- when the equipment is connected to the supply network having a supply voltage up to 480 V AC or up to 400 V DC and a rated output voltage up to 120 V DC, and
- where the protection against electric shock relies on double or reinforced insulation, and with double or reinforced insulation between all AC and DC inputs and outputs.

NOTE 1 In the following countries, the acceptable nominal supply voltage is up to 600 V AC: CA, US.

Particular requirements for portable and mobile DRI EV supply equipment are covered by IEC TS 61851-3-2023.

Equipment for the conductive transfer of electric power between the supply network and an electric road vehicle/RESS according to the IEC TS 61851-3 series is intended to be connected to vehicles where the vehicle power supply circuit is protected against electric shock by double or reinforced insulation.

NOTE 2 For information regarding protection against electric shock by double or reinforced insulation of the EV or of the vehicle power supply circuit, see ISO 18246:2023, 6.1.1 b) and Table 3.

Requirements for bidirectional energy transfer DC to AC are under consideration and are not part of this document.

This document also applies to EV supply equipment supplied from on-site storage systems (e.g. buffer batteries).

This document applies to VCUs intended to be a part of DRI EV supply equipment specified in this document.

This document applies to equipment for the conductive transfer of electric power between the supply network and an electric road vehicle/RESS intended to be installed and/or used at an altitude of up to 2 000 m.

The aspects covered in this document include

- the connection to the vehicle,
- characteristics to be complied with by the vehicle with respect to the AC or DC,
- the specification for required level of electrical safety for the double or reinforced insulated (DRI) EV supply equipment,

- operators and third-party electrical safety,
- requirements for command and control communication for safety and process matters, if required,
- requirements for bidirectional power transfer DC to DC, and
- the connection to installations according to IEC 60364-7-722.

NOTE 3 In the following countries, electrical installation codes other than those from IEC 60364-7-722 are used: CA, US.

Equipment covered by this document is not intended to be located in hazardous areas where flammable gas or vapour and/or combustible materials, fuels or other combustible or explosive materials are present. Additional requirements can apply to these locations.

This document does not apply to

- aspects related to maintenance,
- electrical devices and components, which are covered by their specific product standards,
- trolley buses and rail vehicles,
- vehicle power supply circuit, which is covered by ISO 18246, and
- EMC requirements for on-board equipment while connected to the supply, which are covered by IEC 61851-21-1.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies:
