ISO 23662:2021(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 34, *Food products*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

The purpose of this document is to provide the technical criteria for foods and food ingredients suitable for vegetarians (including ovo-lacto-, ovo- and lacto-vegetarians) or vegans for use by the food and beverage industry at a global level, as well as technical criteria for food labelling and claims.

The document specifies technical criteria to all food and beverage companies, applicable to all organizations, regardless of size or complexity. This document is intended for use in business-to-business communications, relationships in the global food supply chain, the international trade of food products, and food labelling and claims.

Conformity to this document helps to ensure a level-playing field and fair practices in business-to-business relationships, international trade, and food labelling and claims.

NOTE Legally required information, food labelling or claims, or other applicable legal requirements can apply.

Definitions and technical criteria for foods and food ingredients suitable for vegetarians or vegans and for labelling and claims

1 Scope

The document specifies the definitions and technical criteria to be fulfilled for foods and food ingredients to be suitable for vegetarians (including ovo-lacto-, ovo- and lacto-vegetarians) or vegans as well as for food labelling and claims.

It is applicable to business-to-business communication (B2B), to the food trade, and to food labelling and claims. The definitions and technical criteria apply only post-harvest/collecting.

It does not apply to human safety, environmental safety, socio-economic considerations (e.g. fair trade, animal welfare), religious beliefs and the characteristics of packaging materials.
