Aerospace series - Cable, electrical, for digital data transmission - Part 008: Single braid - Star Quad 100 Ohms - Type KD - Product standard

Táto norma obsahuje anglickú verziu európskej normy.  
This standard includes the English version of the European Standard.

Táto norma bola oznámená vo Vestníku ÚNMS SR č. 04/24

Obsahuje: EN 3375-008:2024

Oznámením tejto normy sa ruší  
STN EN 3375-008 (31 1845) z augusta 2009

Norme de produit

Luft- und Raumfahrt - Elektrische Leitungen für  
Digitaldatenübertragungen - Teil 008: Einfach  
geschirmt - Quad 100 Ohm - Typ KD - Produktnorm

This European Standard was approved by CEN on 12 June 2023.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

## European foreword

This document (EN 3375-008:2024) has been prepared by ASD-STAN.

After enquiries and votes carried out in accordance with the rules of this Association, this document has received the approval of the National Associations and the Official Services of the member countries of ASD-STAN, prior to its presentation to CEN.

This document shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by August 2024, and conflicting national standards shall be withdrawn at the latest by August 2024.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 3375-008:2009.

The main changes with respect to the previous edition are listed in the following table.

**Table 1 — Main changes to previous edition**

prEN/EN number	Edition	Publication date	Modification	Reason and validation
prEN 3375-008	P1	2008-01-31	§1 SCOPE: Added sentences “The cable resists a long-term temperature between $-65\text{ °C}$ and $+200\text{ °C}$ . Moreover, cable materials are compatible with $200\text{ °C}$ peak exposure.”	Add complementary information about $T\text{ °C}$ compatibility regarding environment and cable materials.
			§5 TESTS: Table 4, EN 3475-402: Change from “Applicable $T = (125 \pm 5)\text{ °C}$ Shrinking of the insulation = $0,8\text{ mm max.}$ ” to “Not Applicable” on Component (samples from finished cable)	Harmonization with AIRBUS ABS1503 specification
			§5 TESTS: Table 4, EN 3475-403: Change from “Applicable $T = (125 \pm 5)\text{ °C}$ Mandrel $\varnothing = 20\text{ mm}$ ” to “Not Applicable” on Component (samples from finished cable)	Harmonization with AIRBUS ABS1503 specification

**EN 3375-008:2024 (E)**

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this document: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

## 1 Scope

This document specifies the dimensions, tolerances, required characteristics and the mass of an AWG 24 shielded quad cable, type KD, intended for high speed (100 Mbit/s) full duplex Ethernet networks.

Linked to this particular application, the operating temperatures of the cable are between  $-65\text{ °C}$  and  $125\text{ °C}$ .

The cable resists a long-term temperature between  $-65\text{ °C}$  and  $+200\text{ °C}$ .

Moreover, cable materials are compatible with  $200\text{ °C}$  peak exposure.

This cable is laser markable, this marking satisfies the requirements of EN 3838.

The characteristics impedance is  $(100 \pm 15)\ \Omega$ .

## 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
