### Waste collection and transportation management - Vocabulary (ISO 24161:2022)

Gestion de la collecte et du transport des déchets -Vocabulaire (ISO 24161:2022) Abfallsammlung und Abfalltransportmanagement -Terminologie (ISO 24161:2022)

This European Standard was approved by CEN on 5 May 2024.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

#### **European foreword**

The text of ISO 24161:2022 has been prepared by Technical Committee ISO/TC 297 "Waste collection and transportation management" of the International Organization for Standardization (ISO) and has been taken over as EN ISO 24161:2024 by Technical Committee CEN/TC 183 "Waste management" the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by November 2024, and conflicting national standards shall be withdrawn at the latest by November 2024.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

#### **Endorsement notice**

The text of ISO 24161:2022 has been approved by CEN as EN ISO 24161:2024 without any modification.

#### **Foreword**

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see <a href="www.iso.org/directives">www.iso.org/directives</a>).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see <a href="https://www.iso.org/patents">www.iso.org/patents</a>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see <a href="https://www.iso.org/iso/foreword.html">www.iso.org/iso/foreword.html</a>.

This document was prepared by Technical Committee ISO/TC 297, *Waste collection and transportation management*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at <a href="https://www.iso.org/members.html">www.iso.org/members.html</a>.

#### Introduction

#### 0.1 General

With global waste generation on the rise, municipalities must consider more efficient waste collection and transportation management, including the interoperability and safe use of equipment or technologies.

Hence, it is important to agree on a set of harmonized terms and definitions to provide a common basis for communication and information exchange on waste collection and transportation management. This will help to minimize ambiguity, confusion and misunderstanding of terms used in the waste management industry.

This document enables users to understand the scope of the work of ISO/TC 297 and is the source document for the terms and definitions of ISO/TC 297. Where a term and definition are required in a single document, the term and definition will be referenced in that document.

These terms and definitions will serve as the basis for a common language for regulations, standards, academia, research and training in the waste management industry.

#### 0.2 Vocabulary structure

The arrangement of terms and definitions in this document is based upon terms corresponding to "waste management" and "collection and transportation" in the waste collection and transportation management field. The organization of terms is illustrated in Figure 1.

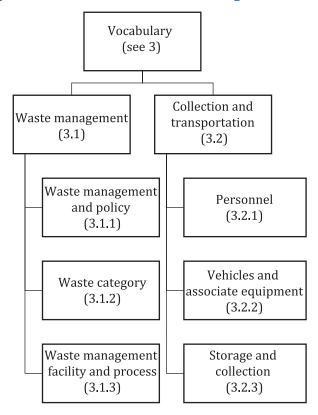

Figure 1 — Vocabulary structure

### Waste collection and transportation management — Vocabulary

#### 1 Scope

This document defines terms that are commonly used in the area of waste collection and transportation management. It aims to align with terminology used internationally.

#### 2 Normative references

There are no normative references in this document.

koniec náhľadu – text ďalej pokračuje v platenej verzii STN

- a) the shifting of responsibility (physically and/or economically; fully or partially) upstream towards the producer and away from government or municipalities;
- b) the provision of incentives to producers to take into account environmental considerations when designing their products.

Note 2 to entry: An EPR can be only financial or can be financial and operational depending on national laws.

#### 3.1.1.3

#### illegal dumping

disposal (3.1.3.3) of waste (3.1.2.31) without legal permission, in violation of national laws
