European foreword

This document (CEN/TR 17842-2:2024) has been prepared by Technical Committee CEN/TC 136 “Sports, playground and other recreational facilities and equipment”, the secretariat of which is held by DIN.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

CEN/TR 1784 consists of the following parts, under the general title Playground equipment for children — Replies to requests for interpretation of EN 1176:2017 and its parts:

- Part 1: Replies to requests for interpretation of EN 1176:2017 and its parts (2018-2019)
- Part 2: Replies to requests for interpretation of EN 1176:2017 and its parts (2020-2022)

Any feedback and questions on this document should be directed to the users’ national standards body. A complete listing of these bodies can be found on the CEN website.

CEN/TR 17842-2:2024 (E)**Introduction****Interpretations and no-action decisions**

This document contains all agreed responses to interpretation requests of the years 2020 to 2022 concerning the understanding of clauses and requirements in EN 1176 and its parts. The responses concern those requests that have resulted in an interpretation or a decision that no action is required as the standard is sufficiently clear. It should bring a close to all interpretations made to EN 1176 and its parts.

An interpretation does not have the same status as the text of the standard. However, following an interpretation gives assurance that the relevant clause of the standard has been applied correctly.

An interpretation is a clarification of the meaning of the standard.

Disclaimer

The interpretations have been prepared by the interpretation panel of CEN/TC 136/SC 1 in accordance with an agreed process and finally confirmed by the whole CEN/TC 136/SC 1 prior to responding back to the enquiring National Standardization Body. The information contained herein should always be considered in association with the original published text contained in the EN 1176 standard series.

Requests for interpretations can be submitted by a CEN member body through its national mirror committee or by a CEN/TC 136 liaison organization (but not directly by an individual or a company) – in accordance with the interpretation panel process agreed by CEN/TC 136/SC 1. The requests are channelled to the CEN/TC 136/SC 1 interpretation panel, which will then deal with the request.

A request for an interpretation may lead to:

- a) an interpretation of the standard with no action to the standard (no revision and no amendment)

This should reflect a reasonable interpretation of how the standard should be used, taking into account:

- 1) the wording of the standard;
- 2) the rationale of the standard;
- 3) the history of the standard.

This is also applicable when it is agreed that the standard appropriately specifies how playground equipment is assessed.

- b) a proposal for an amendment of the standard

This is applicable when it is agreed that the existing standard clauses need urgent update, for example, if the interpretation identifies a serious conflict that compromises safety.

NOTE All replies to interpretation requests received since 2017 are published in the CEN/TR 17842 series. As required, additional parts of this TR are published to include any new interpretations that have been agreed since the publication of the previous TR part. Proposals for amendments will be progressed as new work item proposals in accordance with CEN rules.

c) a future revision

It is not part of the interpretation panel process to carry out new work that was not previously covered within the published EN 1176 parts and clauses. Future work requests should always be raised by National Standard Bodies using the “Future work request template” to ensure full consideration is given to the necessity and possible consequences, before starting any new work on EN 1176 and its parts.

Responses to interpretation requests

Since requests for interpretations are submitted through a CEN member body, it is assumed that the member body will keep itself informed about decisions concerning the request and its progress and will itself inform the originator of the request, as appropriate.

The following information requests have been included in this document:

2020

Table 1

Request Number	Standard reference	Clause	Submitting country	Key words
2020-01	EN 1176-1	4.2.12.2	Sweden	Sand cranes
2020-02	EN 1176-2	4.5, 3.13, 4.6.3 & Annex B	Netherlands	Parent-child swing
2020-03	EN 1176-5	5.2.3	Finland	Ground clearance, tapered underside
2020-04	EN 1176-6	3.11, 4.5	Denmark	Restraint of motion, damping
2020-05	EN 1176-2	3.13	Denmark	Group swing seat, parent-child swing
2020-06	EN 1176-1	A.2.6.1	Denmark	Swing seats, gondola, traditional
2020-07	EN 1176-1	Annex H	Lithuania	adequate level of impact attenuating surfacing
2020-08	EN 1176-7	scope	Lithuania	Scope
2020-09	EN 1176-2	Impact Area, Group swing seat	Netherlands	Impact area, group swing
2020-12	EN 1176-5	4.3 and 4.5, Table 1	Sweden	Type D, user stations, Annex E
2020-13	EN 1176-4	4.9	Türkiye	Impact test method
2020-14	EN 1176-1	4.2.8.5.4	Finland	Adjacent platforms

CEN/TR 17842-2:2024 (E)**2021****Table 2**

Request Number	Standard reference	Clause	Submitting country	Key words
2021-01	1176-1	4.2.8.2.4, table 4	Sweden	Bark, woodchip, particle size
2021-02	1176-1	4.2.7.2b	Sweden	Entrapment, partially bound test probe

2022**Table 3**

Request Number	Standard reference	Clause	Submitting country	Key words
2022-02	EN 1176-1	7.2.7.2	Sweden	Partially bound openings
2022-03	EN 1176-3	4.8	Finland	Impact areas, slides, falling spaces
2022-04	EN 1176-1	4.2.8.4	Finland	Falling space, obstacles, climbing, risk assessment
2022-05	EN 1176-1	4.2.4.3	Finland	Guardrails, falling height, climbing

1 Scope

The purpose of this document is to publish replies to requests for interpretations to all parts of EN 1176 which have been drafted by the interpretation panel and confirmed by CEN/TC 136/SC 1.

2 Normative references

There are no normative references in this document.
