Strahlanlagen - Sicherheits- und Umweltanforderungen (ISO 23779:2024)

This European Standard was approved by CEN on 3 October 2024.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

requirements of EU Directive 2006/42/EC aimed to be covered	4

European foreword

This document (EN ISO 23779:2025) has been prepared by Technical Committee ISO/TC 306 "Foundry machinery" in collaboration with Technical Committee CEN/TC 202 "Foundry machinery" the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by August 2025, and conflicting national standards shall be withdrawn at the latest by August 2025.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 1248:2001+A1:2009.

This document has been prepared under a standardization request addressed to CEN by the European Commission. The Standing Committee of the EFTA States subsequently approves these requests for its Member States.

For the relationship with EU Legislation, see informative Annex ZA, which is an integral part of this document.

Any feedback and questions on this document should be directed to the users' national standards body/national committee. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

Endorsement notice

The text of ISO 23779:2024 has been approved by CEN as EN ISO 23779:2025 without any modification.

EN ISO 23779:2025 (E)

Annex ZA

(informative)

Relationship between this European Standard and the essential requirements of EU Directive 2006/42/EC aimed to be covered

This European Standard has been prepared under a Commission's standardization request "M/396 Mandate to CEN and CENELEC for Standardisation in the field of machinery" to provide one voluntary means of conforming to essential requirements of Directive 2006/42/EC of the European Parliament and of the Council of 17 May 2006 on machinery, and amending Directive 95/16/EC (recast).

Once this standard is cited in the Official Journal of the European Union under that Directive, compliance with the normative clauses of this standard given in Table ZA.1 confers, within the limits of the scope of this standard, a presumption of conformity with the corresponding essential requirements of that Directive and associated EFTA regulations.

Table ZA.1 — Correspondence between this European Standard and Annex I of Directive 2006/42/EC

The relevant Essential Requirement of Directive	Clause(s)/ subclause(s) of this EN	Remarks/Notes
1.1.2 (a)	5, 8	
1.1.2 (c)	5, 8	
1.1.2 (d)	5, 8	
1.1.2 (e)	5, 8	
1.1.3 Materials and products	5.7, 5.8, 5.11, 5.15	
1.1.7 Operating positions		not covered
1.2.1 Safety and reliability of control systems	5.5, 5.6	
1.2.3 Starting	5.5, 5.8	
1.2.4.3 Emergency Stop	5.4, 5.8	
1.2.4.4 Assembly of machinery	5.5, 5.16	
1.2.5 Selection of control or operating modes	5.5, 5.8	
1.2.6 Failure of the power supply	5.5, 5.10	
1.3.3 Risks due to falling or ejected objects	5.6, 5.7, 5.8, 5.9	
1.3.4 Risks due to surfaces, edges or angles		not covered
1.3.7 Risks related to moving parts	5.8, 5.9, 5.11	
1.3.8.1 Moving transmission parts	5.6	
1.3.8.2 Moving parts involved in the process	5.8, 5.9, 5.11	
1.3.9 Risks of uncontrolled movements	5.7, 5.10	
1.4.2.1 Fixed guards	5.2, 5.8, 5.9	
1.4.2.2 Interlocking movable guards	5.2, 5.8, 5.9	
1.5.1 Electricity supply	5.3	

The relevant Essential Requirement of Directive	Clause(s)/ subclause(s) of this EN	Remarks/Notes
1.5.2 Static electricity	5.13	
1.5.3 Energy supply other than electricity	5.7	
1.5.6 Fire	5.15	
1.5.7 Explosion	5.15	
1.5.8 Noise	5.14, Annex B	
1.5.13 Emissions of hazardous materials and substances		Not covered
1.5.14 Risk of being trapped in a machine	5.8	
1.5.15 Risk of slipping, tripping or falling	5.8	
1.6.1 Machinery maintenance	5.8	
1.6.2 Access to operating positions and servicing points	5.8	
1.7.1 Information and warnings on the machinery	5.8	
1.7.1.1 Information and information devices	5.1	
1.7.1.2 Warning devices	5.1, 5.8	
1.7.2 Warning of residual risks	5.8, 5.11, 5.12, 5.15	
1.7.3 Marking of machinery	8.3	
1.7.4 Instructions	8.1	
1.7.4.1 General principles for the drafting of instructions	8.1	
1.7.4.2 Contents of the instructions	5.6, 5.7, 5.8, 5.11, 5.12, 5.13, 5.15, 8.1, 8.2.1, 8.2.2, 8.2.3, Annex B	
1.7.4.3 Sales literature		not covered

WARNING 1 Presumption of conformity stays valid only as long as a reference to this European Standard is maintained in the list published in the Official Journal of the European Union. Users of this standard should consult frequently the latest list published in the Official Journal of the European Union.

WARNING 2 Other Union legislation may be applicable to the product(s) falling within the scope of this standard.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 306, *Foundry machinery*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 202, *Foundry machinery*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

This document is a type C standard as stated in ISO 12100:2010 and also deals with aspects of environmental impact and energy efficiency.

The design, the construction and the actual operation of shot blasting machinery affects aspects of safety, energy usage and environmental impact. It is essential to minimize energy usage and environmental impact while achieving the safety requirements given in this document.

The machinery concerned and the extent to which hazards, hazardous situations and hazardous events are covered are indicated in the scope of this document. When provisions of this type C standard are different from those which are stated in type A or B standards, the provisions of this type C standard take precedence over the provisions of the other standards, for machines that have been designed and built according to the provisions of this type C standard.

Where for clarity an example of a preventative measure is given in the text, this should not be considered as the only possible solution. Other solutions can be used as far as they fulfil correctly the criteria expressed in the requirement.

This document assumes that the shot blasting machinery is operated and maintained by trained personnel.

Shot blasting machinery — Safety and environmental requirements

1 Scope

This document specifies safety and environmental requirements for shot blasting machinery.

Shot blasting machinery includes:

- wheel blasting machinery;
- air blasting machinery for dry and wet blasting;
- combined wheel and air blasting machinery.

NOTE Annex A illustrates examples of shot blasting machinery.

This document is applicable to:

- all significant hazards, hazardous situations and hazardous events relevant to shot blasting machinery, when used as intended and under the conditions foreseen by the manufacturer, including reasonably foreseeable misuse:
- measures for minimization of environmental impact and energy usage of shot blasting machinery.

Interfaces between shot blasting machinery and other equipment used in shot blasting but not in the scope of this document are:

- mechanical and electrical interface to external workpiece transport system;
- connector to electrical energy supply;
- connector to fresh air supply ducting;
- connector to exhaust air ducting;
- connector to pressurized air supply;
- connector to water supply;
- connector to waste water system;
- interface for safe exchange of control signals;
- connector for fresh air supply for respiratory protection device (in blast rooms).

NOTE Annex C gives an illustration of interfaces between shot blasting machinery and other equipment used in shot blasting but not in the scope of this document.

The specific significant risks related to mobile and movable shot blasting machinery (e.g. shot blasting machines designed for operation at changing locations) are not dealt with in this document.

This document does not apply to:

- high pressure water jet machinery;
- dry-ice blasting machinery.

This document does not apply to shot blasting machines manufactured before the date of its publication as an ISO standard.

NOTE The requirements specified in this document can serve as a guideline for a risk assessment of shot blasting machines manufactured before the date of its publication as an ISO standard.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
