EUROPÄISCHE NORM

October 2025

ICS 71.100.30

Supersedes EN 13630-3:2002

English Version

Explosives for civil uses - Detonating cords and safety fuses - Part 3: Verification of insensitiveness to friction of the core of detonating cords

Explosifs à usage civil - Cordeaux détonants et mèches de sûreté - Partie 3 : Vérification de l'insensibilité au frottement de l'âme des cordeaux détonants

Explosivstoffe für zivile Zwecke - Sprengschnüre und Sicherheitsanzündschnüre - Teil 3: Überprüfung der Reibunempfindlichkeit der Seele von Sprengschnüren

This European Standard was approved by CEN on 15 September 2025.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

European foreword

This document (EN 13630-3:2025) has been prepared by Technical Committee CEN/TC 321 “Explosives for civil uses”, the secretariat of which is held by UNE.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by April 2026 and conflicting national standards shall be withdrawn at the latest by April 2026.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN 13630-3:2002.

EN 13630-3:2025 includes the following significant technical changes with respect to EN 13630-3:2002:

- a) the document title has been changed from “Part 3: Determination of sensitiveness to friction of the core of detonating cords” to “Part 3: Verification of insensitiveness to friction of the core of detonating cords”;
- b) the Scope has been revised to clarify the explosives covered and not covered in the document;
- c) the normative references have been updated;
- d) the terminology entries 3.1 and 3.2 have been removed;
- e) Clause 4 “Principle” has been added;
- f) Clause “Apparatus” has been updated;
- g) Clause “Preparation of test sample” and has been revised;
- h) Clause “Procedure” has been revised so that no longer a determination of the sensitiveness to friction is carried out but only the verification of the insensitiveness to friction at 28 N;
- i) Clause 8 “Expression of results” has been added;
- j) Clause “Test report” does no longer require conformity with EN ISO/IEC 17025 and the information to be provided has been updated and enlarged;
- k) former Annex A “Range of applicability of the test method” has been removed;
- l) Annex ZA has been updated;
- m) the Bibliography has been added and lists, e.g. EN ISO/IEC 17025:2017.

This document has been prepared under a standardization request addressed to CEN by the European Commission. The Standing Committee of the EFTA States subsequently approves these requests for its Member States.

For the relationship with EU Legislation, see informative Annex ZA, which is an integral part of this document.

EN 13630-3:2025 (E)

A list of all parts in the EN 13630 series, published under the general title *Explosives for civil uses — Detonating cords and safety fuses*, can be found on the CEN website.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

1 Scope

This document specifies a test method for the verification of the insensitiveness to friction of the core of detonating cords.

This document does not apply to safety fuses.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.
